

L-49: INDIAN SOCIETY - Comprehensive Notes

Sarrthi IAS | Anthropology Foundation | Nataraj Sir | Paper 1 (Units 3.2, 3.3, 5.3) | Team Avengers

L-49 TOPIC MAP

3.2 Jajmani System ↔ 3.2 Tribe-Caste Continuum ↔ 5.3b Great & Little Tradition ↔ 5.3b Universalisation & Parochialisation
↔ 3.3 Sacred Complex ↔ 3.3 NMS Complex

Jajmani links castes in village → Tribe-Caste shows mobility between categories → GT/LT explains cultural layers → U&P shows movement between layers
→ Sacred Complex is GT/LT integration at pilgrim sites → NMS is tribal worldview linking ecology + spirit

3.2 JAJMANI SYSTEM

Origin & Definition

Aspect	Detail
First reported by	William H. Wiser - <i>The Hindu Jajmani System</i> (1936)
Field site	Karimpur village, Uttar Pradesh
Regional equivalents	<i>Yajamani</i> (Tamil Nadu), <i>Jenmi</i> (Kerala)

Oscar Lewis (1958): "Under this system each caste group within a village is expected to give certain standardized services to the families of other castes."

Key Stakeholders

Term	Meaning
Jajman	Higher caste person who <i>receives</i> services; called <i>Rajah</i> (King)
Kamin	Lower caste person who <i>performs</i> services (<i>kam karne wala</i>); called <i>subjects</i>

Oscar Lewis - Rampur Village Study

Caste	Service to Jats (landowners)
Kumhaar (Potter)	Supplies earthen vessels
Lohar (Blacksmith)	Supplies agricultural tools
Kachhi (Carpenter)	Supplies & repairs wooden tools
Nai (Barber)	Shaving and haircutting

- Agriculture-based system of **production & distribution** of goods/services
- Servicing castes linked with **land-owning dominant castes**
- A system of **social, economic & cultural ties** between caste groups

6 Characteristics of Jajmani System

#	Feature	Details
1	Permanent	Kamin cannot leave Jajman; Jajman cannot replace Kamin. Lifelong fixed relations.
2	Hereditary	Rights divided like property on family separation (N.S. Reddy). Pass to son; if no male heir, to son-in-law.
3	Goods against services	Payment in cash/kind, not employer-employee. Carpenter: 1 mound grain/year + 2-3 seers at harvest. Sweeper: 2 meals/day + grain at harvest + food at marriages.
4	Social (not just economic)	Humanitarian relation. Jajman responsible for Kamin's welfare; Kamin serves with devotion.
5	Peace & contentment	W.H. Wiser: Kamins feel security (no worry about employment); Jajmans assured of services.
6	Ritual dimension	Kamins perform ritual duties at birth, marriage, death ceremonies.

Ritual Example: Thakur Family (Lucknow, UP)

 **Oscar Lewis (1958)** - gave this example of 10 castes serving life-cycle rites:

Caste	Ritual Role
Brahmin	Nama-sanskarana (naming ceremony)
Sunar (Goldsmith)	Gold ornaments for newborn
Dhobi (Washerman)	Washes dirty clothes
Nai (Barber)	Carries messages
Khati (Carpenter)	Provides wooden stool (patta)
Lohar	Provides kara (bracelet)
Kumhar (Potter)	Provides kulhar (jugs) for water
Pasi	Provides patal (leaf plates)
Bhangi (Scavenger)	Cleans place after feast

Disadvantages

Disadvantage	Detail
Exploitation & discrimination	 Oscar Lewis - Rampur study: personal relationships became exploitation of Kamins by Jajmans
Restricts social mobility	Hereditary = no occupational change possible
Caste system evils	 Oscar Lewis - conditions of Kamins miserable; upper castes harass them

Scholarly Perspectives

Scholar (Year)	Focus	Key Argument
 Pauline Kolenda (1963)	Occupational division of labour	She sees it as a system of distribution; higher-caste Jajmans provided services by lower castes
 Berreman (1953)	Social dynamics	Not easy for agriculturist to remove a family attached to his household
 Harold Gould (1972)	Internal functioning	Jajmani relations operate at family level - Rajput family has ties with one family each from Brahmin, barber, carpenter etc.

Functions of Jajmani System

- Regulates **division of labour & economic interdependence** of castes
- Maintains village as **self-sufficient unit**
- Distributes agricultural produce in exchange for menial/craft services
- Maintains **prestige of higher castes**

Factors of Change

 **Yogendra Singh** identified 4 major trends:

#	Trend	Impact
1	Subsistence → Surplus economy	Shift in economic power from landowners to non-agricultural groups
2	Modern technology	New economic opportunities; changes traditional division of labour
3	Abolition of intermediaries (Zamindars)	Alters traditional power structures & patron-client relationships
4	Emergence of associations/institutions	New avenues for social mobility; fragmentation of traditional relationships

Decline (Post-Independence) - 3 Causes

Cause	Mechanism
1. Role of State	Planned development: credit, fertilizers, irrigation, HYV seeds → broke Jajman's monopoly as provider
2. Technical innovations & industrialization	Safety razors → barbers decline; Steel utensils → potters decline; Bore wells/hand pumps → kahaars decline
3. Political mobilization of Dalits/OBCs	Constitution committed to empowerment; new identity among Dalits; democratic assertion = serious blow to exploitative system

Memory Aid - Jajmani Decline (STP): State intervention | Technology flooding rural markets | Political mobilization of backward classes

3.2 TRIBE-CASTE CONTINUUM

Origin of Concept

Aspect	Detail
Concept coined by	 R. Redfield in <i>The Folk Culture of Yucatan</i>
Original model	'Folk-Urban Continuum' - cultural shift from rural to urban is gradual , not sudden
Applied to India by	Bailey & Surajit Sinha → 'Tribe-Caste Continuum'

Continuum: A gradual progression or range without any clear boundaries or sudden changes.

TRIBE ←————→ CASTE
 Totally Isolated → Partially Isolated → In Cultural Contact → Totally Assimilated
 (Onge, Sentinelese) (Chenchu) (Gonds)
 (Meeraasi/Bhumij)

4 Scholars' Classifications

Scholar	Basis of Distinction	Key Points
 J.H. Hutton	Religious beliefs	Animist beliefs = Tribe; else = Caste. Economic/political/ecological factors secondary.
 Andre Beteille	3 criteria: Geographic isolation, Dialect, Religion	Tribe = world within itself, few external ties. Religion is a "loose criterion" - continuum without sharp breaks.
F.G. Bailey	Structural (politico-economic)	Caste = organic & hierarchical; Tribe = segmentary & egalitarian. "Both merging into a different system which is neither one nor the other." Limitation: practical value limited as both are transforming.
Surajit Sinha	Fieldwork in Bastar	Lower castes share tribal emphasis on equality; freedom for women in cultural activities; supernatural beliefs similar.

Tribes & Hinduisation

Ghurye (1943): Called tribal populations "an imperfectly integrated segment of the Hindus" - '**backward Hindus**'

Scholar	Work	Contribution
 N.K. Bose	<i>Hindu Methods of Tribal Absorption</i> (1941)	Showed Jati influence on tribes of Odisha; Hindu society gradually absorbed tribal groups - some fully, some partially
 Martin Orans	<i>The Santhal: A Tribe in Search of a Great Tradition</i> (1965)	Tribes attracted towards Hinduism; many remain 'tribes' in name only due to Hinduisation

Examples of Tribe-Hindu Interaction

Tribe (Region)	Nature of Interaction
Jenu-Kuruba (Karnataka)	Food-gathering tribe; supplied elephants to temples & state armies; forest products exchanged for goods; paid taxes/rents = economic integration
Toda (Nilgiris, TN)	Pastoral; worshipped deity at Nanjangud (Karnataka) ~140 km away = long-distance religious interaction
Munda (Jharkhand, 19th c.)	Socially & economically integrated; participated in local markets; shared agricultural practices

Narrative	Significance
Ekalavya & Dronacharya	Tribal boy denied training; demanded thumb as guru-dakshina = unequal interaction of tribes with caste society
Bhima & Hidimbi	Bhima married tribal woman Hidimba; son Ghatotkacha fought in Mahabharata war = integration of tribal lineage into Hindu epic
Bhils & Parvati's Curse	Shiva gave Nandi to Bhils (Parvati's brothers); they killed it; cursed never to farm = links Bhils to Hindu deities; explains non-agrarian life

 **Inter-linkage:** Tribe-Caste Continuum connects to **Jajmani System** (service relationships assimilate tribes into caste hierarchy) and to **Great/Little Tradition** (Hinduisation = absorption of Little Tradition tribal beliefs into Great Tradition framework).

5.3b GREAT AND LITTLE TRADITION

Concept

Robert Redfield - *Peasant Society and Culture* (1956): Every society has two types of traditions - elite class tradition (Great) and non-literate common people's tradition (Little).

Comparison Table

Parameter	Great Tradition	Little Tradition
People	Elite class	Non-literate peasant/common people
Origin	Urban centres	Folk community
Basis	Religious texts	Traditional beliefs
Transmission	Formal centres, religious texts, written	Oral, generation to generation
Spread	Wide geographical area	Localised
Nature	Organised, formal, literate	Unorganised, informal, unwritten
Examples	Gita, Ramayana, Upanishads, Bible, Quran	Folklore, magical rituals, local practices

- **Sacred Specialists** mediate between GT & LT; propagate GT elements to LT by popularising myths & legends
- Religious centres like **Gaya, Varanasi** embody Great Tradition
- Though separate in origin, GT & LT are **interdependent and interact**

Prominent Example: Jagannath at Puri

Case: Jagannath Puri - GT/LT Integration

- By 12th century, a **local tribal deity** (wooden image made by tribal specialists) was recognised as **Jagannatha - a form of Vishnu**
- Jagannatha (right), Subhadra (centre, sister), Balarama (left, brother)
- Vishnu visualized differently from other parts of India
- **Goddess cults:** Local stone deities (smeared with ochre) incorporated into Puranic framework as wives of male deities = Lakshmi or Parvati

Limitation: S.C. Dube's Critique (1965)

 **S.C. Dube (1965):** Indian cultural realities are "too complex" for a mere '**bipolar model**'. His view is '**multipolar**' - proposed **sixfold classification**.

#	Tradition Type	Example
1	Classical (mythology, Sanskrit texts)	Ramayana, Mahabharata
2	Regional (shared cultural traits of region)	Bhangra (Punjab), Bihu (Assam)
3	Local (tribal/village-based)	Bhuta worship (Karnataka), Karam festival (Jharkhand)
4	Western (colonial contact)	Railways, telegraph, Western dress codes
5	Emergent national (revival & identity)	Ganesh festival by Tilak during freedom struggle
6	Sub-cultural (specific elite groups)	Mughal court culture, Nawabi traditions of Lucknow

 **Mandelbaum & S.C. Dube:** The term 'Great Tradition' can't be static since there's constant interaction & interchange between the two traditions.

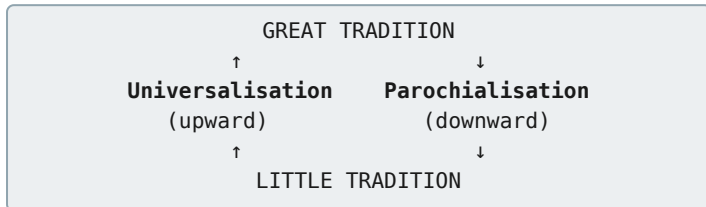

Memory Aid - Dube's 6 Traditions (CR-LW-EN-S): Classical | Regional | Local | Western | Emergent National | Sub-cultural

5.3b UNIVERSALISATION & PAROCHIALISATION

Scholar & Background

Aspect	Detail
Scholar	 McKim Marriott
Book	 <i>Village India: Studies in the Little Community</i> (1955)
Background	Student of Redfield; came to India with Milton Singer; studied village communities

The Two Movements

Concept	Direction	Definition
Universalisation	LT → GT (upward)	Local/folk elements elevated to become part of pan-Indian Great Tradition
Parochialisation	GT → LT (downward)	Great Tradition elements come down and merge into localised Little Tradition

Examples

Parochialisation: Gobardhan Puja at Kishangarhi

- **GT belief:** Lord Krishna lifted Govardhan hill as umbrella against Indra's fury
- **LT manifestation:** People at Kishangarhi worship **heaps of cow dung** imitating this belief
- *Gobardhan* = cow dung (Hindi); *Govardhan* = the hill (~40 km away)
- Marriott calls this a **parochialised form** of Govardhan puja

Universalisation: Raksha Bandhan from Saluno

- **LT practice:** *Saluno* at Kishangarhi - married daughters apply tilak of barley on unmarried sisters & brothers; get money/gifts
- Brahmin priests tie Rakhi on Jajmans & get return
- **GT outcome:** Marriott contends Raksha Bandhan came into being as universalisation of *Saluno*

Kerala Example: Andaloor Kavu (Thalassery, Kannur)

- Local deities: Daivathar, Angakkaran, Boppooran (worshipped through **Theyyam** = LT)
- Equated with GT deities: Sreeraman, Lakshmanan, Hanuman respectively
- = Interplay of both universalisation & parochialisation

Limitation: Circular, Not Linear

Example: Ramayana - The Circular Process

- **LT:** Oral folk stories in villages
- → **GT:** Shaped into Sanskrit epic by **Valmiki**
- → **LT:** Translated by **Tulsidas** into *Ramcharitmanas* (Hindi); recitations in homes & **Ram Lila** dramas in villages
- **Cycle:** LT → GT → LT (circular & continuous, not merely two-directional)

 **Inter-linkage:** U&P explains **how Hinduisation works** (Tribe-Caste Continuum): tribal deities get universalised into Hindu pantheon; Hindu texts get parochialised into local tribal rituals. The **Sacred Complex** is the physical site where this exchange happens.

3.3 SACRED COMPLEX

Origin

Aspect	Detail
Scholar	L.P. Vidyarthi (1961)
Book	 <i>The Sacred Complex in Hindu Gaya</i>
School	Chicago School of Anthropology
Teacher	 Robert Redfield
Field site	Hindu pilgrim centre Gaya , Magadh, Bihar

Three Components

Component	Definition	Example at Gaya
Sacred Geography	Significant places where rites are performed; help in cultural transmission of GT elements	Idols in temples, sacred trees, bathing ghats
Sacred Performances	Rites & rituals performed by worshippers; vary with nature of each centre	Gaya Shraddha (ritual for ancestors)
Sacred Specialists	Maintain distinct lifestyle; transmit GT to rural population by popularising texts & organising pilgrimage	Gayawal Brahmins

Sacred Complex = An intricate and interdependent grouping of sacred geographies, sacred performances, and sacred specialists. Reflects **combination, continuity, & compromise** between GT and LT elements.

Significance (5 Functions)

1. **Cultural transmission:** Unfolds channels for integration of civilization
2. **Social integration:** Meeting place for different castes, sects, classes, statuses
3. **Integrates GT & LT:** Mechanism of sacred complex + pilgrimage = effective means of integration
4. **Promotes creative arts & literature:** Preserves 'ideal types' (GT elements)
5. **Binding force:** Binds people against geographical diversities & social/linguistic heterogeneity

Scholars Who Extended the Concept

Scholar (Year)	Study Site	Key Contribution
S.C. Saraswati (1962, 1965)	Naimisharanya (UP), Goa, Kashi	Pilgrimage = sacred act; sacred institutions regulate secular life (festivals, local leadership); Kashi = textual & contextual continuity
Jha (1971, 1977)	Janakpur (Nepal), Puri	Civilisation transcends political borders (Sita's birthplace); Jagannath cult analysis; sacred complexes are dynamic
S.C. Bharati (1963, 1970)	Across India	Comprehensive survey across Hindu, Buddhist, Tantric traditions; inter-religious perspective; shared yet contested geographies
David Sopher (1968)	Field-based	Service castes (barbers, washermen, priests) crucial for pilgrim activity; centres = socio-economic systems reinforcing caste
Bharadwaj (1973)	Multiple	Pilgrim fields; caste composition of pilgrims; hierarchical ranking of sacred places; living social institutions
R.N. Narayan (1974)	Deoghar (WB)	Deoghar = microcosm of Indian civilisation; heterogeneity of pilgrims (caste, class, language, education)
Patnaik (1977)	Puri	<i>Cultural Tradition in Puri</i> ; Jagannath cult = religious & socio-cultural integrator
Narayana Reddy	Tirumala	Applied Vidyarthi's model + added secular dimension (secular geography, specialists, activities); sacred & secular blend = holistic cultural system

Memory Aid - Sacred Complex 3 Components (GPS):
Geography | Performances | Specialists

3.3 NATURE-MAN-SPIRIT (NMS) COMPLEX

Origin

Aspect	Detail
Scholar	L.P. Vidyarthi
Basis	Cultural Ecology - constant interaction between Man & Nature
Vidyarthi's addition	Third element - the Spirits
Core idea	Constant interaction between social organization, ecological conditions, & religious complex in tribal life

The Maler Tribe - Vidyarthi's Study

Aspect	Detail
Tribe	Maler (hill tribe)
Location	Upper side of Rajmahal Hills
Economy	Shifting cultivation (Khallu)

Four Types of Maler Spirits

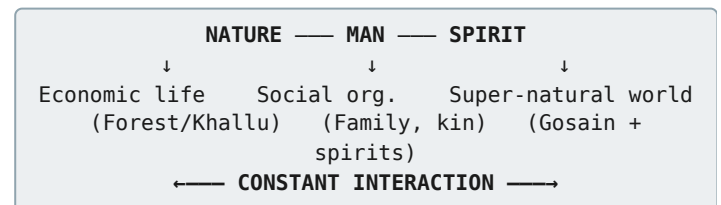

Spirit	Nature
Gossaiyan	Benevolent; governs ALL spirits; bridge between Malers & superhuman concept
Jiwe Urrkya	Ancestral spirits
Alchi	Evil spirits
Chergani	Spiritual power of witch/witchcraft

Broadly: (1) **Benevolent** = good health, wealth, agricultural productivity | (2) **Malevolent** = sickness, abortions, death

Key rule: Maler tribes don't do anything without approval of **Gosaiyyan**

NMS in Action: Maler Displacement

During government developmental activities, Maler tribes were brought down from hills. Some became ill, some died. **Malers believed malevolent Gosaiyyan was angry** at them for leaving the hills. = Spirit world directly explains material suffering.

Other Studies Based on NMS

Scholar (Year)	Community	Location	Key Finding
 Dr. V.S. Sahay (1981)	Nicobarese	A&N Islands	Different setting (island surrounded by sea); same forces; NMS is "the only model which can best describe the essence of Nicobarese Culture"
 R.K. Prasad (1981)	Parahiya	Bihar	Similar conclusions
 S.G. Morab	Soliga	Karnataka	Similar conclusions
 R.S. Mann	Onge	Andamans	Similar conclusions
 R.K. Sinha	Pando	Madhya Pradesh	Similar conclusions
 Ramesh Chandra	Kinner	Himachal Pradesh	Similar conclusions
 Prabhat K. Singh (1986)	Kurmi	Chotanagpur	Similar conclusions

 **P.K. Singh (1981) - Restudy of Maler:** Studied same villages as Vidyarthi two decades later. Concluded: "The NMS complex **cannot change - it is a constant!** Even if the content may change through time, the complex itself remains constant."

Significance of NMS (5 Points)

#	Significance	Example
1	Holistic worldview - unity of nature, man, spirit	Santhals: Baha festival = worship of village deities + sacred groves (<i>Jaherthan</i>)
2	Explains resistance to change - disruption of sacred land disturbs worldview	Dongria Kondh vs Vedanta mining in Niyamgiri Hills = "Niyam Raja"
3	Tool for applied anthropology - culturally sensitive development	Verrier Elwin's "Tribal Panchsheel" (1950s) = minimal interference
4	Sustainable resource use - sacred taboos maintain ecological balance	Khasi & Garo (Meghalaya) = sacred groves; cutting trees prohibited
5	Integration of tradition & development	Jharkhand/Chhattisgarh: Sarhul festival (worship of sal trees) + community discussions on agriculture

CASE STUDY: Dongria Kondh & Niyamgiri Hills

- Who:** 15,000+ Kondh tribes (Dongria & Kutia) in 160 villages, Rayagada & Kalahandi, Odisha
- Sacred belief:** Hills worshipped as '**Niyam Raja**'
- Threat (2004):** Vedanta set up pit-head alumina refinery at Lanjigarh (foothills)
- Stakes:** Odisha has 700 million tonnes bauxite reserves; 88 million tonnes in Niyamgiri
- Violation:** Environmental laws violated; Dongria's consent not sought
- SC Ruling (April 18, 2013):** Mining clearance only if **gram sabhas** comprising Dongrias agreed
- Result:** All **12 villages voted AGAINST** the project = India's first environmental referendum

 **Inter-linkage:** NMS Complex is the **tribal equivalent** of Sacred Complex - both show how spirit/religion governs daily life. While Sacred Complex works at **pilgrim centres** (civilizational level), NMS works at **tribal habitat level**. Both are studied by Vidyarthi. NMS explains why tribes resist change in the **Tribe-Caste Continuum**.

CURRENT HOOKS (Recent Developments)

#	Development	Topic Link
1	SC Judgment on Orans (2024): Supreme Court declared Rajasthan's sacred groves (<i>Orans</i>) as 'forests', ordering national policy for managing sacred groves - validates NMS worldview in law	NMS Complex / Sacred Groves
2	PVTGs Budget (2024-25): PM-JANMAN scheme with Rs 24,000 crore outlay for 75 PVTGs across 18 states - recognises need for culturally sensitive development (echoes Tribal Panchsheel)	Tribe-Caste Continuum
3	Sacred Groves Research (2026): Wiley journal study on community values & management of sacred groves in Mayurbhanj, Odisha - confirms living NMS traditions persist	NMS Complex
4	Democratization & Jajmani: 2025 research paper documents how democratization & electoral mobilization has fundamentally transformed Jajmani relations in rural India	Jajmani System decline
5	Niyamgiri Legacy (ongoing): 2013 SC verdict continues to be cited as landmark precedent for tribal consent (FPIC) in development projects across India	NMS / Tribal rights

QUICK REVISION CHEAT SHEET

Topic	Main Points (Keywords)	Key Scholars	Examples	Key Case Studies
Jajmani System	Agriculture-based production/distribution; Hereditary; Permanent; Goods vs services; Ritual; Self-sufficient village; Decline: State + Tech + Political mobilization	W.H. Wiser (1936, Karimpur); Oscar Lewis (1958, Rampur); N.S. Reddy (hereditary); Pauline Kolenda (1963); Berreman (1953); Harold Gould (1972); Yogendra Singh (change factors)	Kumhaar/Lohar/Nai/Khati serving Jats; Safety razors replacing barbers; Steel utensils replacing potters; Bore wells replacing kahaars	Thakur family (Lucknow) served by 10 castes for life-cycle rites; Rampur village exploitation study
Tribe-Caste Continuum	Gradual progression; No sharp boundaries; Hinduisation; Tribal absorption; Folk-Urban model applied to Indian society	R. Redfield (continuum concept); J.H. Hutton (religious basis); Andre Beteille (3 criteria); F.G. Bailey (structural); Surajit Sinha (Bastar); Ghurye (backward Hindus); N.K. Bose (tribal absorption); Martin Orans (Santhal)	Onge/Sentinelese (isolated) → Chenchu → Gonds → Bhumij (assimilated); Bhils & Parvati's curse; Khasa/Bhils in Ramayana	Jenu-Kuruba supplying elephants to temples; Toda worshipping at Nanjangud; Ekalavya-Drona; Bhima-Hidimbi
Great & Little Tradition	GT = elite/formal/literate/urban/written; LT = folk/oral/local/unorganised; Interdependent; Sacred specialists mediate; Bipolar vs Multipolar critique	Robert Redfield (1956, Peasant Society & Culture); S.C. Dube (1965, multipolar/6-fold); Mandelbaum (GT not static)	GT: Gita, Ramayana, Gaya, Varanasi; LT: Folklore, magical rituals; Jagannath at Puri (tribal deity → Vishnu); Goddess cults (stone → Lakshmi/Parvati)	Jagannath Puri (tribal wood deity recognised as Vishnu by 12th c.); Dube's 6-fold: Classical, Regional, Local, Western, Emergent National, Sub-cultural
Universalisation & Parochialisation	U = LT → GT (upward); P = GT → LT (downward); Not linear but circular; Continuous process; Field: Kishangarhi	McKim Marriott (1955, Village India); Milton Singer; Robert Redfield (teacher)	P: Gobardhan Puja (cow dung = Govardhan hill); U: Raksha Bandhan from Saluno; Kerala: Theyyam deities = Rama/Lakshman/Hanuman	Ramayana circular cycle: folk tales (LT) → Valmiki Sanskrit (GT) → Tulsidas Ramcharitmanas + Ram Lila (LT)
Sacred Complex	3 components: Geography + Performances + Specialists (GPS); Combination, continuity, compromise of GT & LT; Social integration; Cultural transmission; Binding force	L.P. Vidyarthi (1961, Hindu Gaya); S.C. Saraswati (Naimisharanya, Goa, Kashi); Jha (Janakpur, Puri); S.C. Bharati; David Sopher; Bharadwaj; R.N. Narayan (Deoghar); Patnaik (Puri); Narayana Reddy (Tirumala + secular dimension)	Gaya: Gayawal Brahmins + Gaya Shraddha + temples/ghats; Tirumala: sacred + secular (shops, hotels, employment)	Narayana Reddy added secular dimension to Sacred Complex at Tirumala; Jha showed civilisation transcends borders (Janakpur, Nepal)
NMS Complex	Nature + Man + Spirit in constant interaction; Cultural Ecology + Spirits; Complex is CONSTANT even if content changes; Tribal worldview; Explains resistance to displacement	L.P. Vidyarthi (Maler, Rajmahal Hills); V.S. Sahay (1981, Nicobarese); P.K. Singh (1981, Maler restudy - "constant!"); R.K. Prasad (Parahiya); S.G. Morab (Soliga); R.S. Mann (Onge); Verrier Elwin (Tribal Panchsheel)	Maler spirits: Gossaiyan, Jiwe Urrkya, Alchi, Chergani; Khallu (shifting cultivation); Santhals' Baha festival + Jaherthan; Khasi/Garo sacred groves; Sarhul festival	Dongria Kondh vs Vedanta (Niyamgiri) : 15,000 Kondhs; 88M tonnes bauxite; SC 2013; all 12 gram sabhas voted NO = India's 1st environmental referendum

Key Definitions (One-Liners for Answer Writing)

Term	Definition	Scholar
Jajmani System	"Each caste group within a village gives certain standardized services to families of other castes"	Oscar Lewis (1958)
Great Tradition	Tradition of elite class, transmitted through formal centres in literate manner	Robert Redfield
Little Tradition	Tradition of non-literate common people, transmitted orally	Robert Redfield
Universalisation	Upward movement of LT elements to become part of GT	McKim Marriott
Parochialisation	Downward movement of GT elements to merge into LT	McKim Marriott
Sacred Complex	Intricate grouping of sacred geographies, performances, and specialists	L.P. Vidyarthi
NMS Complex	Constant interaction between social organization (man), ecology (nature), and religious complex (spirit) in tribal life	L.P. Vidyarthi
Tribe-Caste Continuum	Gradual range from totally isolated tribal groups to totally assimilated caste groups	Bailey, Surajit Sinha
