

# L-51: Indian Society — Comprehensive Notes

Sarrthi IAS | Nataraj Sir | Anthropology Foundation | UPSC CSE 2026

Sanskritization

Westernization

Modernization

Religious & Linguistic Minorities

Growth of Anthropology

Panchayati Raj

Media & Social Change

## 🗺️ TOPIC MAP — L-51 Overview

**Part 1:** Sanskritization, Westernization, Modernization (Ch 5.3a)

**Part 2:** Religious & Linguistic Minorities (Ch 5.2)

**Part 3:** Growth of Anthropology in India (Ch 4)

**Part 4:** Panchayati Raj & Social Change (Ch 5.3)

**Part 5:** Media & Social Change

**Inter-linkages:** All topics connect through *processes of social change* in India

## PART 1: SANSKRITIZATION

**M. N. Srinivas** — coined in "*Religion and Society among the Coorgs of South India*" (1952)

**Definition:** "The process by which a low caste or tribe or other group takes over the customs, rituals, beliefs, ideology and lifestyle of a higher caste and in particular '**twice born**' (**dwija**) caste."

### Core Argument

- Caste system has **never been so rigid** that individuals/castes cannot alter or raise their status
- Mediation shaped by **local dominant castes** — Brahmin, Kshatriya, or Vaishya models depending on region

### Changes Adopted (Cultural Emulation)

- Giving up non-veg, alcohol, animal sacrifice
- Imitating Brahmin lifestyle — food, dress, rituals
- Donning sacred thread
- Giving up pig sacrifice at weddings 🍖
- Dowry replacing bride price**
- Cultural Emulation → **Cultural Erosion**

## Regional Examples

| Region                  | Community                                   | Claim/Action                     |
|-------------------------|---------------------------------------------|----------------------------------|
| Bihar                   | Rajwars (SC)                                | Claim Kshatriya status           |
| Bihar                   | Koyeris (BC)                                | Identify as Kushwaha Kshatriya   |
| Bihar                   | Dusadh (SC)                                 | Adopt Gahlout Kshatriya identity |
| Maharashtra & Rajasthan | Mahar, Pasi                                 | Abandon polluting occupations    |
| Central India           | Gonds, Cheros, Sudha Saoras, Paudi Bhuiyans | Undergo Sanskritization          |
| Rajasthan               | Meena                                       | Absorbed into Hindu fold         |
| Bihar & WB              | Santhal, Munda                              | Absorbed into Hindu fold         |
| UP                      | Jounsari, Khasas, Tharu                     | Absorbed into Hindu fold         |

## Impact on Women & Family

- Autonomy of women & freedom to choose partner = **LOST**
- Family shifts to **orthodox Hindu joint family** — paternal authority, monogamy
- Food habits change (beef, pork, liquor abandoned)
- Dowry system **replaces bride price**

### 📌 Case Study: Nangeli of Travancore

Lower caste women (Nadars, Ezhavas) had to pay **mulakkaram** ("breast tax") to cover upper bodies.

**Nangeli** — Ezhava woman who cut off her breasts in protest → died of blood loss.

Men paid **talakkaram** (head tax) or **meeshakkaram** (moustache tax). 🖋️

## The Paradox

Lower castes that become prosperous/educated claim **higher status** through Sanskritization — but **fiercely retain "backward" status** for reservations/jobs. "Modern India is full of contradictions." 🖋️

### Harold Gould (1988)

*"The prime motive force behind Sanskritization is **repressed hostility** — victims try to **seize control** of the system rather than reject it, expiating frustrations on the same battlefield where they acquired them."*

## New Agents of Sanskritization

- Newspapers, microphone, radio/TV = new agents 🖋️
- Example: Booking Tirupati pooja online → strengthens Sanskritization 🖋️
- Village festivals increasingly Sanskritized

## Variants of Sanskritization

| Variant           | Meaning                                                                               | Example                                                                                                                                                                      |
|-------------------|---------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Resanskritization | Group moves away then <b>returns</b> to Sanskritic practices                          | <b>Lingayats, Karnataka</b> — Basavanna's radical bhakti → later re-adopted idol worship/temple rituals                                                                      |
| Desanskritization | Groups <b>deliberately abandon</b> Sanskritic practices; revive indigenous traditions | <b>Ramnamis, Chhattisgarh</b> — tattooed "Ram" on bodies, rejected priestly mediation<br><b>Sarna Revivalism, Jharkhand</b> — Santhal, Munda, Ho, Oraon reject Hindu deities |

## Scholar Summary — Sanskritization

| Scholar                     | Key Argument                                                                                                        |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------|
| <b>M. N. Srinivas</b>       | Coined concept; multiple models (Brahmin/Kshatriya/Vaishya) depending on dominant caste                             |
| <b>Milton Singer (1968)</b> | Multiple models; contemporary mobility = more about <b>political participation</b>                                  |
| <b>Yogendra Singh</b>       | Extended to <i>varna</i> framework; critiqued for hierarchy focus; manifests <b>repressed inter-class hostility</b> |
| <b>William Rowe</b>         | Less functional today vs. political participation                                                                   |
| <b>Harold Gould (1988)</b>  | Prime motive = repressed hostility; victims seize control                                                           |

**Key Takeaway:** Sanskritization gains are largely **symbolic rather than structural**. Contemporary India uses education, politics, and law for dignity and equality beyond Sanskritic models.

## WESTERNIZATION

**M. N. Srinivas** — All cultural changes and institutional innovations due to **150+ years of British rule**.

Wider plane: scientific approach, materialism, individualism, liberal approach, humanism, equality, egalitarianism, rationalism.

## Impacts of Westernization

| Domain                   | Impact                                                                       |
|--------------------------|------------------------------------------------------------------------------|
| Scientific & Educational | Modern schools, colleges, universities, scientific institutions              |
| Political                | Nationalism, modern leadership, democratic institutions                      |
| Caste & Family           | Lessening caste rigidity, disintegration of joint families, reform movements |
| Economic                 | Decline of cottage industries, commercial crops, new land management         |
| Social Values            | Democracy, equality, social justice, uniform administration                  |

Westernization ↔ Sanskritization Link (Srinivas)

- **Accelerates:** Railways, post, newspapers → increased pilgrimages, caste meetings, religious propaganda
- **Weakens:** Highly Westernized people live in "world of class rather than caste"; drop caste names, intermarry

Harold Gould

Once a caste is fully Sanskritized, it cannot rise further — higher castes used Western lifestyles as alternative form of distinction. 

Three Global Views on Westernization

| View       | Scholar                            | Key Argument                                                                                                                     |
|------------|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Conflict   | Samuel Huntington                  | Cultural conflicts between West & Rest. Three responses: isolation, band-wagoning, balancing                                     |
| Optimistic | Kishore Mahbubani                  | New global civilization emerging; Western influence <b>unraveling</b> as Eastern powers rise ( <i>The New Asian Hemisphere</i> ) |
| Critical   | Edward Said ( <i>Orientalism</i> ) | Westernization = colonial domination; knowledge & domination intertwined                                                         |

Indian Context

- **John McLane** — Indian nationalist movement drew from Western ideas of democracy & rights
- **B. R. Nanda** — Nehru carried such "Britishness" → called himself "the last Englishman to rule India" 

Limitations of Westernization

- **Over-generalised** — clubs different influences under one label
- **Eurocentric bias** — assumes Western values inherently progressive
- **Neglects selective adoption** — communities accepted science but resisted Christianization
- **Ignores resistance** — Swadeshi movement, revivalist reforms
- **Static view of the West** — ignores its internal contradictions 

MODERNIZATION

**Eisenstadt:** "Process of change towards social, economic, political systems developed in W. Europe & N. America (17th–19th century), later spread globally."  
**Yogendra Singh:** "Symbolizes a **rational attitude** towards issues — evaluation not from particularistic point of view."

Historical Roots

| Phase                                       | Key Developments                                                                                                              |
|---------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>Neolithic Revolution</b> (c. 10,000 BCE) | Ploughs → raised productivity → permanent villages → surplus → specialization                                                 |
| <b>Industrial Revolution</b> (18th–19th C)  | Steam, electricity, factory system; dismantled agrarian hierarchies; American & French revolutions                            |
| <b>Cultural Dimension</b>                   | <b>Max Weber</b> — "Protestant Ethic & Spirit of Capitalism" (1904): rational discipline & work ethic → industrial capitalism |

Modernization vs Westernization

S. C. Dube (1988)

"Modernization is **less value-loaded** than Westernization. Modernization emphasizes rational and scientific progress **without threatening cultural identity**."

| Westernization = Modernization                                    | Westernization ≠ Modernization                                                                                                                                                |
|-------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Railways, telegraphs, English education, constitutional democracy | Blind imitation of fashion, fast food, Valentine's Day; wearing suits in Indian summers  |

Features of Modernized Personality — Daniel Lerner

| Feature                   | Meaning                                 | Example                                                    |
|---------------------------|-----------------------------------------|------------------------------------------------------------|
| <b>Empathy</b>            | See from another's perspective          | Ambedkar's temple entry; Saudi Arabia relaxing dress codes |
| <b>Mobility</b>           | Geographical + social mobility          | Ambedkar's rise; Saudi women driving ban lifted            |
| <b>High Participation</b> | Political, economic, social involvement | Dalit mobilization; Saudi women in workforce (Vision 2030) |

## Indian Model of Modernization

**S. C. Dube (1974)**

*"There is no standard model of modernization and no fixed path. Developing societies can adopt a model of their own choice."*

- India's path: **democracy, secularism, social justice**
- **DPSP Article 48** — modernizing agriculture & animal husbandry
- Challenges: regional imbalances, corruption, nepotism

## Contemporary Issues

- **NCRB 2021:** 74 deaths from witchcraft & human sacrifice → gaps in modernization
- **Narendra Dabholkar** — campaigned for national anti-superstition law 
- Women demanding mosque entry, equal inheritance

## Limitations of Modernization Theory

- Not uniform/linear — IT hubs coexist with witchcraft deaths
- Neglects inequality — Green Revolution widened class divides
- Resistance from cultural/religious conservatism
- Overemphasizes progress, underestimates costs (environment, alienation)
- Alternative modernities overlooked — Gandhian decentralization, tribal sustainable models 

### Mnemonic: S-W-M Comparison

Sanskritization = Status within hierarchy (symbolic)  
| Westernization = Whole cultural import (value-loaded) | Modernization = Mind-change (rational, value-neutral)

## PART 2: RELIGIOUS MINORITIES

### Census 2011 — Religious Communities

| Group      | Population (mn) | %     |
|------------|-----------------|-------|
| Hindus     | 966.3           | 79.8% |
| Muslims    | 172.2           | 14.2% |
| Christians | 27.8            | 2.3%  |
| Sikhs      | 20.8            | 1.7%  |
| Buddhists  | 8.4             | 0.7%  |
| Jains      | 4.5             | 0.4%  |
| ORP        | 7.9             | 0.7%  |

### Constitutional Provisions

| Article    | Provision                                                                  |
|------------|----------------------------------------------------------------------------|
| Art. 29    | Protection of interests of minorities (distinct language, script, culture) |
| Art. 30    | Right to establish & administer educational institutions                   |
| Art. 350-A | Instruction in mother tongue at primary stage                              |
| Art. 350-B | Special Officer for linguistic minorities (7th Amendment Act, 1956)        |

#### Lord Acton

"The most certain test by which we judge whether a country is really free is the amount of **security enjoyed by minorities**."

### Notified Religious Minorities

- Initially 5: **Muslims, Christians, Sikhs, Buddhists, Zoroastrians (Parsis)**
- 27 Jan 2014:** Jains added as 6th minority community

### Problems of Religious Minorities

| Problem              | Details                                                                                               |
|----------------------|-------------------------------------------------------------------------------------------------------|
| Identity             | Socio-cultural differences; difficulty adjusting with majority                                        |
| Security             | Insecurity about life, assets when relations strained                                                 |
| Equity               | Deprived of development opportunities. UNDP MPI 2018: "Every 2nd ST, every 3rd Dalit & Muslim = poor" |
| Communal Tension     | 2013 Muzaffarnagar; 2002 Godhra                                                                       |
| Under-representation | Sachar Committee: Muslims 14% population → only 2.5% bureaucracy, 5% politics                         |
| Politicization       | Karnataka Hijab (2022); CAA 2019                                                                      |
| Fear Mongering       | Shaheen Bagh women painted "anti-national" 🖍️                                                         |

#### 📌 Karnataka Hijab Controversy (2022)

Feb 2022: Muslim students denied entry for wearing hijabs → counter-protests in saffron scarves → Govt directed uniforms without exceptions → **15 March 2022: Karnataka HC upheld ban** (hijab not essential religious practice). Criticized by **Malala Yousafzai & Human Rights Watch**.

### Justice Ranganath Mishra Commission — Key Recommendations

- 10% reservation** for Muslims; 5% for other minorities in govt jobs
- In 27% OBC quota → **8.4% sub-quota** for minorities (6% Muslims + 2.4% others)
- Delink SC status from religion** — abrogate 1950 SC Order (excludes Muslims, Christians from SC net)
- Establish **Morarji Desai Residential Schools** for minorities at taluk level

## LINGUISTIC MINORITIES

A group whose **mother tongue differs from the majority in the state** (determined state-wide, not nationally).

### Key Court Cases

- 1971 — DAV College vs. State of Punjab:** Linguistic minority = at least a **spoken language** (script not needed)

- **TA Pai Foundation vs. State of Karnataka:** Status determined in **context of states**, not India as a whole

Problems of Linguistic Minorities

| Problem               | Details                                                              |
|-----------------------|----------------------------------------------------------------------|
| Lack of funds         | No teaching in minority languages; XAXA Committee: low PVTG literacy |
| Language diversity    | Dominance of major languages threatens smaller ones                  |
| Grievance redressal   | Forced to use majority's language                                    |
| Social discrimination | Treated as outsiders in professional settings                        |
| Cultural erosion      | Major languages erode unique identities                              |
| Economic disparities  | Opportunities linked to proficiency in major languages               |

**Conclusion:** "A civilisation can be judged by the way it treats its minorities." Way forward = implementing **Justice Ranganath Mishra Commission** recommendations + inclusive development.

PART 3: GROWTH OF ANTHROPOLOGY IN INDIA

🌍 Four Phases at a Glance

- Phase 1:** Formative (1774–1919) — Documentation

**Phase 3:** Analytical (1950–1990) — Complex studies
- Phase 2:** Constructive (1920–1949) — Institutions

**Phase 4:** Evaluative (1990–present) — New subfields

| Phase        | Period       | Key Developments                                                                                                                                    | Key Figures                                                                                                                                       |
|--------------|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Formative    | 1774–1919    | Tribal life documentation; handbooks, gazettes; revenue reports of Dalton, Buchanon, Lord Baden Powell 🖋️; Asiatic Society (1774)                   | <b>Sir William Jones</b> (Asiatic Society); <b>H.H. Risley</b> (Tribes & Castes of Bengal, 1891); <b>S.C. Roy</b> ("Munda & Their Country", 1912) |
| Constructive | 1920–1949    | Anthropology in Bombay Univ (1919), Calcutta PG (1920); "Man in India" journal (1921); 25th Indian Science Congress (1938); AnSI established (1945) | <b>S.C. Roy</b> (editor, Man in India); <b>Verrier Elwin</b> ("The Baiga", 1939 — isolationist approach); <b>B.S. Guha</b> (1st Director AnSI)    |
| Analytical   | 1950–1990    | Shift from descriptive to analytical; village study monographs; interaction with American anthropologists; new concepts & methodologies             | <b>L.P. Vidyarthi</b> (sacred complexes, nature-man-spirit complex); Redfield, Singer, Marriott                                                   |
| Evaluative   | 1990–present | Medical Anthropology, Development Studies, Industrial Anthropology, Action Research, tribal demography, folk-lore                                   | Focus on tribal identity, integration, applied anthropology                                                                                       |

🧠 **Mnemonic: Phases = F-C-A-E**  
Formative (Document) → Constructive (Institutionalize) → Analytical (Theorize) → Evaluative (Apply)

## PART 4: PANCHAYATI RAJ & SOCIAL CHANGE

### What is Social Change?

- **Anderson & Parker:** Alteration in structure & functioning of societal forms
- **Surinder S. Jodhka:** Changes in values, institutions, and practices

### What is Panchayati Raj?

**Panchayat** = assembly (*ayat*) of five (*panch*); **Raj** = rule  
Oldest system of local government in Indian subcontinent. Leader = **Mukhya/Sarpanch**.  
Type of **direct democracy** at village level.

### Three-Tier Structure

| Level                | Body                    |
|----------------------|-------------------------|
| Village              | <b>Gram Panchayat</b>   |
| Intermediate (Block) | <b>Panchayat Samiti</b> |
| District             | <b>Zilla Panchayat</b>  |

### PRI as Tool of Social Change

#### 1. Leadership from Less Privileged Sections

- Gram Sabha → all eligible voters participate → includes marginalized
- Reservation for SCs/STs as chairpersons
- **Bihar** = first state to reserve **50% panchayat seats for women** → followed by 15 states 
- Challenge: "**Sarpanch pati**" phenomenon — husband controls woman sarpanch (PM Modi raised this on National Panchayati Raj Day, 24 April) 

#### 2. Tribal Rights — PESA

**PESA (Panchayats Extension to Scheduled Areas Act)**  
— Tribal customary rights, cultural rights, language & identity, rights to land, water, forests, minerals.  
Emphasizes tribes' right to **maintain own institutions** and pursue development per their aspirations.

## Case Studies — PRI in Action

| Case Study            | Location                                 | Achievement                                                                                                                       |
|-----------------------|------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <b>Ban on Alcohol</b> | Bhim tehsil, Rajsamand, Rajasthan (2015) | Women campaign → permanent closure of liquor shops. Rule: 51% voters can close a shop                                             |
| <b>Bamboo Bridge</b>  | Latak, Dhemaji, Assam                    | 300-house village built bamboo bridge for flood areas — funded entirely from own resources                                        |
| <b>Social Welfare</b> | Digampur, West Bengal                    | Direct-to-home water, doorstep garbage collection, organic manure handicrafts. Won <b>1st prize — Gram Panchayat Vikas Yojana</b> |
| <b>Environment</b>    | Odisha GPs                               | Plantation activities 2020-21 for green cover & income generation                                                                 |
| <b>Social Issues</b>  | ACNielsen ORG-MARG Survey                | PRI reps addressing: child marriage, gambling, alcoholism                                                                         |

## PART 5: MEDIA & SOCIAL CHANGE

### Marshall McLuhan

*"The medium is the message" — media not only carries information but **shapes how people think and act**, directly influencing social change.*

### Types of Media

- **Print:** Newspapers, magazines, pamphlets
- **Broadcast:** Radio, television
- **Digital:** Internet, social media, online platforms

Positive Impacts

| Impact              | Example                                                                                                                    |
|---------------------|----------------------------------------------------------------------------------------------------------------------------|
| Voice to people     | Dongria Khond vs Vedanta (Niyamgiri) → SC order 18 April 2013: mining only if tribals agree                                |
| Awareness of wrongs | Coverage of honour killings, khap panchayats, lynchings                                                                    |
| Uplifting marginals | Ghasi community (SC, Odisha); FRA 2006 loopholes; #MeToo, #BlackLivesMatter                                                |
| Language revival    | <b>Asur Community</b> — mobile radio for Asur language (UNESCO endangered; ~7000-8000 speakers). Led by <b>Sushma Asur</b> |
| Women empowerment   | <b>Subhash</b> study: "Impact of Mass Media on Women" (Gulbarga District)                                                  |
| Democracy           | Ensures informed choices; "checking function" on elected representatives                                                   |

Negative Impacts

| Impact                | Details/Example                                                                                            |
|-----------------------|------------------------------------------------------------------------------------------------------------|
| Socialization dangers | Fixed to TV; reduced family time; generation gap                                                           |
| Fake news             | Creating inter-community tensions                                                                          |
| Yellow Journalism     | CJI <b>N.V. Ramana</b> : media running "kangaroo courts" — biased, agenda-driven debates                   |
| Election distortion   | Paid news distorting free & fair elections                                                                 |
| Body image            | Shapes ideal body images → mental health impact; promotes junk food                                        |
| Trial by media        | <b>Disha (Priyanka Reddy) case, 2019</b> : Media rallied for "encounter" → all 4 accused killed 6 Dec 2019 |
| Criminal justice      | <b>Bhima Koregaon 2018</b> : Motivated arrests of govt critics                                             |

 Dongria Khond / Niyamgiri

Media coverage of tribe's agitation against Vedanta's bauxite mining → **SC order (18 April 2013)**: Mining clearance only if Dongrias agree. Classic example of media empowering marginalized communities against corporate exploitation.

 CURRENT HOOKS — Recent Developments (2025-26)

| Topic                    | Recent Development                                                                                                                                                                                               |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Panchayati Raj           | <b>People's Plan Campaign (PPC) 2025-26</b> "Sabki Yojana, Sabka Vikas" — focuses on tribal empowerment via Adi Karmayogi Abhiyaan. <b>SabhaSaar</b> — AI tool recording Gram Sabha proceedings in 13 languages. |
| National PR Day 2026     | Theme: "Sashakt Panchayat, Sarvangeen Vikas" — localizing SDGs + digital governance via e-Gram Swaraj                                                                                                            |
| SVAMITVA Scheme          | 2.75+ crore property cards generated; drone surveys in 3.28 lakh villages (land rights digitization)                                                                                                             |
| Minorities               | SC ruled minority status is "state-dependent" — states can grant minority status to any community including Hindus. Govt rejected Ranganath Mishra Commission report as "flawed" (Dec 2023).                     |
| Re-sanskritization trend | Growing inclination towards ancient Indian philosophy, yoga, naturopathy, rural lifestyles, traditional dressing = contemporary forms of re-sanskritization                                                      |

# QUICK REVISION CHEAT SHEET

| Topic                         | Main Points (Keywords)                                                                                                                                                                                       | Key Scholars                                                                                                                       | Examples                                                                   | Key Case Studies                                                             |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|------------------------------------------------------------------------------|
| <b>Sanskritization</b>        | Cultural emulation → cultural erosion; symbolic not structural; dowry replaces bride price; dominant caste models; paradox (claim high + retain backward); new agents (media, online poojas)                 | Srinivas (1952), Harold Gould (repressed hostility), Milton Singer (political participation), Yogendra Singh (varna), William Rowe | Rajwars/Koyeris/Dusadh (Bihar); Gonds, Meena; Tirupati online; Breast tax  | Nangeli (Travancore breast tax protest)                                      |
| <b>Re/De-sanskritization</b>  | Resanskritization = return after moving away;<br>Desanskritization = abandon & revive indigenous                                                                                                             | Basavanna (12th C Lingayat)                                                                                                        | Arya Samaj followers; Adi Dharma (Bengal Dalits)                           | Lingayats (Karnataka); Ramnamis (Chhattisgarh); Sarna Revivalism (Jharkhand) |
| <b>Westernization</b>         | 150+ yrs British rule; accelerates & weakens Sanskritization; 3 global views (conflict/optimistic/critical); Eurocentric bias; gave India nationalism/democracy                                              | Srinivas, Huntington, Mahbubani, Edward Said, John McLane, B.R. Nanda, Harold Gould                                                | Raja Ram Mohan Roy; Nehru "last Englishman"; Swadeshi resistance           | —                                                                            |
| <b>Modernization</b>          | Rational attitude; progress; 3 roots (Neolithic/Industrial/Protestant Ethic); less value-loaded than W; empathy-mobility-participation; Indian model = democracy+secularism+social justice                   | Eisenstadt, Yogendra Singh, S.C. Dube (1974/1988), Daniel Lerner, Max Weber (1904), Dabholkar                                      | Green Revolution; Ambedkar's rise; Saudi Vision 2030; NCRB witchcraft data | —                                                                            |
| <b>Religious Minorities</b>   | 6 notified groups; Art 29/30/350A/350B; problems: identity/security/equity/communal/representation/politicization; Sachar (2.5% bureaucracy); Ranganath Mishra (10%+5% reservation, delink SC from religion) | Lord Acton, Sachar Committee, Ranganath Mishra Commission                                                                          | Muzaffarnagar 2013; Godhra 2002; CAA 2019; Shaheen Bagh                    | Karnataka Hijab (2022) — HC upheld ban                                       |
| <b>Linguistic Minorities</b>  | State-level determination; spoken language sufficient (no script needed); problems: no funds for mother tongue education, cultural erosion, economic disparities                                             | XAXA Committee (PVTGs), DAV College case (1971), TA Pai Foundation case                                                            | Tribal languages dying; English medium shift                               | —                                                                            |
| <b>Growth of Anthropology</b> | 4 phases: Formative (documentation) → Constructive (institutions) → Analytical (theory) → Evaluative (applied); Asiatic Society 1774; AnSI 1945; Man in India 1921                                           | Sir William Jones, H.H. Risley, S.C. Roy, Verrier Elwin, B.S. Guha, L.P. Vidyarthi                                                 | Tribes & Castes of Bengal; Munda & Their Country; The Baiga; 25th ISC 1938 | —                                                                            |

|                                  |                                                                                                                                                                                  |                                                                          |                                                                     |                                                                                                  |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|---------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| <b>Panchayati Raj</b>            | 3-tier (Gram/Block/Zilla); direct democracy; 50% women reservation (Bihar first); "Sarpanch pati" problem; PESA for tribal areas; Gram Sabha = inclusive                         | Anderson & Parker, Surinder Jodhka                                       | Bihar 50% women; PESA tribal rights; PPC 2025-26; SabhaSaar AI tool | Bhim tehsil alcohol ban; Latak bamboo bridge; Digampur (WB) water supply                         |
| <b>Media &amp; Social Change</b> | "Medium is the message"; positive (voice, awareness, empowerment, language revival); negative (fake news, kangaroo courts, trial by media, body image); mirror + motor of change | Marshall McLuhan, CJI N.V. Ramana, Subhash (Gulbarga study), Sushma Asur | #MeToo; #BLM; Asur mobile radio; Ghasi community; paid news         | Dongria Khond/Niyamgiri (SC order 2013); Disha/Priyanka Reddy case (2019); Bhima Koregaon (2018) |

### Master Mnemonic for All 5 Parts

Sanskritization → **W**esternization → **M**odernization = Social Change Processes

**M**inorities (Religious + Linguistic) = Subjects of Change

**A**nthropology Growth = Study of Change

**P**anchayati Raj + **M**edia = Agents of Change

**Remember: SWM-MA-PM** (like "SWIM in a PM session")

#### Inter-linkages to remember:

- Sanskritization ↔ Westernization (accelerate & weaken each other — Srinivas)
- Media = new agent of Sanskritization (online poojas, TV festivals)
- PRI + Media = drivers of social change for minorities & tribals
- PESA connects PRI with tribal rights (overlaps with minorities chapter)
- Growth of Anthropology → analytical phase studied all these processes (Vidyarthi, Srinivas)
