

L-49: INDIAN SOCIETY — COMPREHENSIVE NOTES

Sarrthi IAS | Anthropology Paper 1 (Units 3.3, 5.3) | Nataraj Sir | UPSC CSE 2026

L-49 TOPICS OVERVIEW

Jajmani System (3.2) → Wiser → Lewis → Decline
Tribe-Caste Continuum (3.2) → Redfield → Bailey → Sinha → Hinduisation
Great & Little Tradition (5.3) → Redfield → Dube's Critique
Universalisation & Parochialisation (5.3) → Marriott → Circular Process
Sacred Complex (3.3) → Vidyarthi → Gaya → Extensions
Nature-Man-Spirit Complex (3.3) → Vidyarthi → Maler → NMS Validity

1. JAJMANI SYSTEM (Unit 3.2)

1.1 Origin & Definition

William H. Wiser (1936)

First reported the Jajmani system in *The Hindu Jajmani System — fieldwork at Karimpur village, UP*

Oscar Lewis (1958)

"Under this system each caste group within a village is expected to give certain standardized services to the families of other castes."

Term	Meaning	Also Called
Jajman	Higher caste — receives services	Rajah (King)
Kamin	Lower caste — performs services	Subjects (<i>kam karne wala</i>)

Regional equivalents: *Yajamani* (Tamil Nadu) | *Jenmi* (Kerala)

✎ Occupation hereditary — father → son → grandson. Wiser first drew attention but didn't know it was **universal** in Indian villages.

1.2 Oscar Lewis — Rampur Village Study

Documented relationship between **Jats (landowners)** and servicing castes:

Caste	Service Provided
Kumhaar (Potter)	Earthen vessels
Lohar (Blacksmith)	Agricultural tools
Kachhi (Carpenter)	Wooden tools & repairs
Nai (Barber)	Shaving & haircutting

Key insight: Jajmani = agriculture-based system of **production & distribution** of goods/services linking artisan castes with land-owning dominant castes.

1.3 Six Characteristics

Mnemonic — PH-GSPR: **P**ermanent | **H**ereditary | **G**oods-for-services | **S**ocial (not just economic) | **P**ease & contentment | **R**itual matters

#	Feature	Detail
1	Permanent	Kamin cannot leave Jajman; Jajman cannot replace Kamin — lifelong fixed relations
2	Hereditary	Rights pass to son; if no male heir → son-in-law. ✎ N.S. Reddy: divided like property on family separation
3	Goods against services	Payment in cash/kind. Lewis: Carpenter = 1 mound grain/year; Sweeper = 2 meals/day + grain at harvest
4	Social relationship	Humanitarian, not employer-employee. Jajman responsible for Kamin's welfare
5	Peace & contentment	Wiser: Kamins feel security; Jajmans assured of services
6	Ritual matters	Kamins perform ceremonial duties at birth, marriage, death

✎ Ritual Example — Thakur Family (Lucknow, UP)

Caste	Ritual Role
Brahmin	Nama-sanskarana (naming)
Sunar (Goldsmith)	Gold ornaments for newborn
Dhobi (Washerman)	Washes dirty clothes
Nai (Barber)	Carries messages
Khati (Carpenter)	Wooden stool (<i>patta</i>)
Lohar	Kara (bracelet)
Kumhar (Potter)	Kulhar (water jugs)
Pasi	Patal (leaf plates)
Bhangi (Scavenger)	Cleans after feast

1.4 Scholarly Perspectives

Scholar	Focus	Argument
✎ Beidelman (1959)	Occupational division	System of distribution — Jajmans provided services by lower castes
✎ Kolenda (1963)	Female scholar on labour	Occupational division of labour in agricultural village
✎ Scholar (1953)	Social dynamics	Not easy for agriculturist to remove attached family and get another
✎ Harold Gould (1972)	Internal functioning	Relations at family level — one Rajput family has ties with one family each from multiple castes

1.5 Functions of Jajmani System

- Regulates **division of labour & economic interdependence** of castes
- Maintains village as **self-sufficient unit**
- Distributes agricultural produce for menial/craft services
- Maintains **prestige of higher castes**
- Payments to Kamins at fixed intervals

1.6 Disadvantages

#	Disadvantage	Detail
1	Exploitation & discrimination	Lewis (Rampur): personal relationships became instrument of exploitation
2	Restricts social mobility	Hereditary = no occupation change possible for lower castes
3	Supported by caste system	Suffers from all caste evils; Kamins face miserable conditions & harassment

1.7 Factors of Change (4 Trends)

Factor	Impact
Subsistence → Surplus economy	Shift in economic power from landowners to non-agricultural groups
Modern technology	New economic opportunities; changes traditional division of labour
Abolition of Zamindars	Alters traditional power structures & patron-client relationships
New associations/institutions	Links to urban orgs → new social mobility avenues

1.8 Decline (Post-Independence) — 3 Causes

Cause	Mechanism	Examples
Role of State	Planned development broke Jajman's monopoly as provider	State credit, fertilizers, irrigation, HYV seeds
Technical innovations	Machine-made goods reached rural areas	✂ Safety razors → barbers declined; Steel utensils → potters declined; Bore wells → kahaars declined
Political mobilization	Dalits & OBCs gained new identity; democratic assertion	Constitutional commitment; monopolistic rights of higher castes challenged

📌 Applied Significance — Jajmani System

- **MGNREGA & rural transformation:** State-guaranteed employment replaced traditional patron-client dependency (Drèze & Sen, 2013)
- **Occupational diversification:** Potter communities shifting to construction work; barbers becoming salon operators in semi-urban areas
- **PYQ Link:** "Discuss the factors responsible for the decline of the Jajmani system" (2016, 10 marks)

2. TRIBE-CASTE CONTINUUM (Unit 3.2)

2.1 Origin of Concept

R. Redfield — *The Folk Culture of Yucatan*

Coined 'continuum' — the Folk-Urban Continuum: cultural shift from rural to urban is **gradual**, not sudden.

Applied to India by: Bailey & Surajit Sinha — social mobility in Indian villages/tribal communities = **Tribe-Caste Continuum**

Continuum: A gradual progression or range without any clear boundaries or sudden changes.

Spectrum Diagram

Totally Isolated	Partially Isolated	Cultural Contact	Totally Assimilated
Onge, Sentinelese	Chenchu	Gonds	✂ Meeraasi / Bhumiij

2.2 Scholars' Attempts to Distinguish Tribe & Caste

Scholar	Basis	Key Argument
J.H. Hutton	Religious beliefs	Animist beliefs = Tribe; Otherwise = Caste. Economic/political factors secondary
Andre Beteille	3 criteria	(1) Geographic isolation (2) Dialect differs from major languages (3) Religion — loose criterion, "continuum without sharp breaks"
F.G. Bailey	Structural/politico-economic	Caste = organic & hierarchical; Tribe = segmentary & egalitarian. "Both merging into a different system which is neither one nor the other"
Surajit Sinha	Fieldwork in Bastar	Lower castes share with tribes: emphasis on equality, freedom for women, similar supernatural beliefs. Disciple of Redfield

✂ **Bailey's limitation:** As both caste & tribe get transformed, the practical value of his scheme is limited.

2.3 Tribes & Hinduisation

G.S. Ghurye (1943)

Called tribal populations "an imperfectly integrated segment of the Hindus" — '**backward Hindus**'

Scholar	Work	Contribution
N.K. Bose	<i>Hindu Methods of Tribal Absorption</i> (1941)	Jati influence on tribes of Odisha; showed gradual absorption
Martin Orans	<i>The Santhal: A Tribe in Search of a Great Tradition</i> (1965)	Tribes attracted towards Hinduism; some remain 'tribes' in name only

✂ Mythological Example — Bhils & Parvati's Curse

Bhils of Central India

- Traditionally hunter-gatherers & pastoralists
- Myth: Parvati asked Shiva to gift brothers (Bhils) something → Shiva gave sacred bull **Nandi**
- Greedy brothers killed Nandi hoping for treasure
- **Parvati's curse:** They would never be able to farm
- **Significance:** Links Bhils to Hindu deities; shows tribal identity absorbed into Hindu framework; passes ecological lesson to younger generations

2.4 Examples of Tribe-Caste Interaction

Tribe	Region	Nature of Interaction
Jenu-Kuruba	Karnataka	Supplied elephants to temples/armies; traded forest products; paid taxes — economic integration
Toda	Nilgiris, TN	Pastoral tribe worshipped deity at Nanjangud (140 km away) — long-distance religious interaction
Munda	Jharkhand (19th c.)	Socially & economically integrated; participated in local markets; shared agricultural practices

Mythological Narratives as Interaction

Ekalavya & Guru Dronacharya

Tribal boy denied training → self-taught → forced to give right thumb as guru-dakshina → **Reflects unequal interaction of tribes with caste society**

Bhima & Hidimbi

Bhima married tribal woman Hidimba → Son **Ghatotkacha** fought in Mahabharata war → **Integration of tribal lineage into epic Hindu tradition**

📌 Applied Significance — Tribe-Caste Continuum

- **Scheduled Tribe classification:** Determines welfare benefits — continuum shows why clear boundaries are problematic (Xaxa Committee, 2014)
- **PESA Act 1996 & FRA 2006:** Recognise tribes as distinct from castes needing special governance
- **Identity politics:** Demand for ST status by communities (Gujjars in Rajasthan, Marathas) reflects the blurring continuum

3. GREAT & LITTLE TRADITION (Unit 5.3)

3.1 Core Concept

Tradition = 'to transmit' — transmitted values & behaviour persisting over time. Observable through: oral, social, material behaviour.

Robert Redfield — *Peasant Society and Culture* (1956)

Every civilisation has two traditions that interact: *Great Tradition* (reflective few) and *Little Tradition* (unreflective many).

Parameter	Great Tradition	Little Tradition
People	Elite class	Non-literate peasants/common
Origin	Urban centres	Folk community
Basis	Religious texts	Traditional beliefs
Transmission	Formal centres & texts	Oral — generation to generation
Spread	Wide geographical area	Localised
Nature	Organised, formal, literate	Unorganised, informal, oral
Examples	Gita, Ramayana, Upanishads, Bible, Quran	Folklore, magical rituals, local practices

Sacred Specialists: Mediate between GT & LT; propagate GT elements to common people by popularising myths & legends.

Key Point: Though **separate in origin**, GT & LT are **interdependent and interact**.

 Prominent Example: Jagannath at Puri

Tribal Deity → Vishnu (12th century)

- Local tribal deity (image made of wood by tribal specialists) → recognised as **Jagannath — form of Vishnu**
- Deities: Jagannatha (R), Subhadra (C, sister), Balarama (L, brother)
- Goddess cults:** Local stone deities smeared with ochre → incorporated into Puranic framework as wives of male deities (= Lakshmi/Parvati)
- Shows LT deity absorbed into GT

3.2 S.C. Dube's Critique — Multipolar Model (1965)

Indian cultural realities = **too complex for bipolar model**. Proposed sixfold classification:

#	Tradition Type	Example
1	Classical	Ramayana, Mahabharata shaping Hindu culture
2	Regional	Bhangra (Punjab), Bihu (Assam)
3	Local	Bhuta worship (Karnataka), Karam festival (Jharkhand)
4	Western	Railways (British), Western dress codes
5	Emergent national	Ganesh festival (Tilak during freedom struggle)
6	Sub-cultural	Mughal court culture, Nawabi traditions of Lucknow

Mandelbaum & Dube: 'Great Tradition' is NOT static — constant interaction & interchange between traditions.

 Applied Significance — Great & Little Tradition

- Heritage policy:** UNESCO Intangible Cultural Heritage listings (Kumbh Mela, Yoga) = GT recognition; folk traditions (Chhau dance) gain global platform
- Digital media:** YouTube/OTT retelling of epics (GT) reaches folk audiences → new parochialisation
- PYQ Link:** "Examine the nature of interaction between Great and Little traditions in India" (2017, 20 marks)

4. UNIVERSALISATION & PAROCHIALISATION (Unit 5.3)

4.1 Core Concept — McKim Marriott

McKim Marriott — Village India (1955)

GT & LT do not remain separate compartments — they **move towards each other** through Universalisation & Parochialisation.

Process	Direction	Definition
Universalisation	LT → GT (upward)	Local/folk elements get elevated → become part of pan-Indian Great Tradition
Parochialisation	GT → LT (downward)	Elements of GT come down → merge into localised Little Tradition

Classic Example: Parochialisation

Gobardhan Puja at Kishangarhi

- GT belief:** Krishna lifted Govardhan hill to save people from Indra's fury
- LT practice:** People at Kishangarhi worship **heaps of cow dung** (Gobardhan = cow dung in Hindi)
- Marriott calls this a **parochialised form** of Govardhan puja

Classic Example: Universalisation

Raksha Bandhan from local Saluno festival

- LT origin:** *Saluno* — married daughters apply tilak of barley on siblings, get gifts
- Brahmin priests tie Rakhi on patrons (Jajman) → get payment
- Marriott:** Raksha Bandhan = **universalisation** of local Saluno festival

 Kerala Example — Andaloor Kavu

Location: Near Thalassaery, Kannur. Local deities: Daivathar, Angakkaran, Bopporan (worshipped via **Theyyam** — LT)

Equated with: Sreeraman, Lakshmanan, Hanuman respectively (GT) → interplay of both processes

4.2 The Circular Process (Limitation)

Ramayana — Circular Movement

- Oral folk stories in villages → **LT**
- Shaped into Sanskrit epic by Valmiki → **GT**
- Tulsidas's *Ramcharitmanas* in Hindi → treasured by ordinary people
- Recitations in homes & Ram Lila dramas → re-enters **LT**
- Conclusion:** Not two-directional but **circular and continuous**

 Applied Significance — Universalisation/Parochialisation

- Modern universalisation:** Local harvest festivals (Pongal, Lohri, Bihu) gaining national recognition through media → approaching GT status
- Modern parochialisation:** Yoga (GT, Sanskrit texts) → local adaptations (laughter yoga, corporate yoga) = localised versions
- Digital culture:** Memes parochialise high literature; viral folk art universalises local traditions

5. SACRED COMPLEX (Unit 3.3)

5.1 Core Concept

L.P. Vidyarthi (1961) — The Sacred Complex in Hindu Gaya

Analysed contribution of traditional centres of Indian civilisation. Chicago School of Anthropology. Student of Robert Redfield. Field site: Gaya, Magadh, Bihar.

Three Components

Component	Definition	Example at Gaya
Sacred Geography	Places where rites are performed; aid cultural transmission of GT elements	Idols in temples, sacred trees, bathing ghats
Sacred Performances	Rites & rituals performed by worshippers; vary with centre	Gaya Shraddha (ancestors' ritual)
Sacred Specialists	Maintain distinct lifestyle; transmit GT to rural population	Gayawal Brahmins

Mnemonic — GPS: Sacred **G**eography + Sacred **P**erformances + Sacred **S**pecialists = Sacred Complex

Vidyarthi's conclusion: Pilgrimage centres reflect **combination, continuity, and compromise** between GT & LT.

5.2 Significance of Sacred Complex (5 Points)

#	Significance
1	Cultural transmission — unfolds channels for integration of civilisation
2	Social integration — meeting place for different castes, sects, classes
3	Integrates GT & LT — pilgrimage = effective means of integration
4	Promotes arts & literature — preserves 'ideal types' (GT elements)
5	Binding force — binds people against geographical & social heterogeneity

5.3 Extended Studies on Sacred Complex

Scholar	Site	Key Contribution
S.C. Saraswati (1962, 65)	Naimisharanya, Goa, Kashi	Pilgrimage = sacred act; sacred institutions regulate secular life too; textual & contextual continuity
Jha (1971, 77)	Janakpur (Nepal), Puri	Civilisation transcends political borders; Jagannath cult dynamic & reinterpreted
S.C. Bharati (1963, 70)	Pan-India	Survey across Hindu, Buddhist, Tantric traditions; shared yet contested sacred geographies
David Sopher (1968)	Field-based	Service castes (barbers, priests) sustain pilgrim activity; centres = socio-economic systems
Bharadwaj (1973)	Multiple	Pilgrim fields, caste composition, hierarchical ranking of sacred places; living social institutions
R.N. Narayan (1974)	Deoghar, WB	Deoghar = microcosm of Indian civilisation; heterogeneity of pilgrims
Patnaik (1977)	Puri	Jagannath cult as religious & socio-cultural integrator
Narayana Reddy	Tirumala	Added secular dimension — secular geography, specialists, activities (shops, hotels, employment). Sacred + secular = holistic system

📌 Applied Significance — Sacred Complex

- **PRASAD Scheme** (Pilgrimage Rejuvenation and Spiritual Augmentation Drive): Govt applies sacred complex logic — developing infrastructure at 15+ pilgrim centres
- **Kashi Vishwanath Corridor (2021)**: Sacred geography restructured; shows state engagement with sacred complex
- **Char Dham Highway**: Connecting sacred geography; but raises environmental concerns (Ravi Chopra Committee)

6. NATURE-MAN-SPIRIT (NMS) COMPLEX (Unit 3.3)

6.1 Core Concept

L.P. Vidyarthi

Based on Cultural Ecology — constant interaction between Man & Nature. Vidyarthi added a third element: **Spirits**. The NMS complex = interaction between social organisation, ecological conditions, and religious complex in tribal life.

NATURE — MAN — SPIRIT

Nature (Ecology/Forest/Khallu) ↔ Man (Social organisation/family/kinship) ↔ Spirit (Supernatural world/Gosain)
All three in **constant interaction** = NMS Complex

6.2 The Maler Tribe — Vidyarthi's Field Study

Tribe: Maler (hill tribe) | **Location:** Upper Rajmahal Hills | **Economy:** Shifting cultivation (*Khallu*)

Four Types of Maler Spirits

Spirit	Nature
Gossaiyan	Benevolent — governs all spirits; bridge between Malers & superhuman concept
Jiwe Urrkya	Ancestral spirits
Alchi	Evil spirits
Chergani	Spiritual power of witch/witchcraft

Broadly: Benevolent spirits → good health, wealth, agricultural productivity | Malevolent spirits → sickness, abortions, death

📌 **Key rule:** Malers don't do *anything* without approval of Gosaiyyan

NMS in Action — Government Relocation

During developmental activities, Malers brought down from hills → some fell ill, some died → Malers believed **malevolent Gosaiyyan was angry** at them for leaving. Shows NMS worldview governs response to external change.

6.3 Other NMS Studies

Scholar	Community	Location	Key Finding
Dr. V.S. Sahay (1981)	Nicobarese	A&N Islands	NMS = "only model to describe Nicobarese culture"; blood sacrifice of pig/fowl essential
R.K. Prasad (1981)	Parahiya	Bihar	NMS validated
S.G. Morab	Soliga	Karnataka	NMS in forest ecology
R.S. Mann	Onge	Andamans	Island NMS
Ramesh Chandra	Kinner	Himachal	Mountain NMS
P.K. Singh (1981)	Maler (restudy)	Rajmahal Hills	"NMS complex cannot change — it is a constant!" Content may change but complex persists

6.4 Significance of NMS (5 Points)

#	Point	Example
1	Holistic worldview — humans as part of ecological & spiritual order	Santhals: Baha festival + sacred groves (Jaherthan) linking ecology, community, spirit
2	Explains resistance to change — disruption of sacred land = disturbs worldview	Dongria Kondh resisted Vedanta's mining in Niyamgiri ("Niyam Raja")
3	Tool for applied anthropology — guides culturally sensitive policy	Verrier Elwin's Tribal Panchsheel (1950s) — minimal interference
4	Sustainable resource use — sacred taboos maintain ecological balance	Khasi & Garo sacred groves — cutting trees prohibited
5	Integration of tradition & development	Jharkhand/Chhattisgarh: Sarhul festival + community discussions on agriculture/water

6.5 Case Study: Dongria Kondh & Niyamgiri

India's First Environmental Referendum (2013)

- 15,000+ Kondh tribes in 160 villages, Rayagada & Kalahandi, Odisha
- Worship Niyamgiri Hills as '**Niyam Raja**'
- 2004: Vedanta set up alumina refinery at Lanjigarh (foothills)
- Odisha: 700 million tonnes bauxite; 88 million in Niyamgiri
- Environmental laws violated; consent not sought
- **April 18, 2013:** SC ruled gram sabhas must consent
- **Result:** All 12 villages voted AGAINST the project
- **Significance:** NMS worldview protected through democratic process; precedent for tribal rights over sacred landscapes

📌 Applied Significance — NMS Complex

- **FRA 2006:** Recognises community forest rights — aligns with NMS understanding of Nature-Man bond
- **PESA 1996:** Gram sabha consent for mining — respects spiritual attachment to land
- **Climate change:** Traditional Ecological Knowledge (TEK) of tribes (rooted in NMS) being studied for sustainable solutions
- **SC Judgments:** *Orissa Mining Corporation v. MoEF* (2013) upheld tribal spiritual rights

1. Char Dham Highway Project (2024-25): Supreme Court's observation on balancing sacred geography with ecological concerns — directly applies Sacred Complex framework. Ravi Chopra Committee raised landslide risks.

2. Particularly Vulnerable Tribal Groups (PVTGs) — Mission (2023-24): PM-JANMAN scheme (₹24,000 cr) for 75 PVTGs. Development approach must respect NMS worldview for effective implementation.

3. Great Nicobar Island Project (2024): ₹72,000 cr development plan threatens Shompen tribe — NMS concerns of indigenous groups vs. strategic interests. National Green Tribunal monitoring.

4. Jajmani System Vestiges: MGNREGA (2023-24 data: 6+ crore households) further weakens remaining patron-client ties in rural India by providing state-guaranteed employment.

5. Digital Universalisation: Ramayana on OTT platforms (2024) = new form of universalisation where folk narratives gain pan-Indian digital audiences (Marriott's framework applied to digital age).

INTER-LINKAGES MAP

Link	Connection
Jajmani ↔ Caste System	Jajmani is the economic arm of caste hierarchy; decline mirrors caste weakening
Jajmani ↔ Sacred Complex	Kamins perform ritual services at sacred occasions — part of sacred performances
GT/LT ↔ Sacred Complex	Sacred specialists = mediators between GT & LT; pilgrim centres = GT nodes reaching LT populations
Universalisation ↔ Tribe-Caste	Hinduisation of tribes = tribes absorbing GT elements = universalisation of tribal beliefs into Hindu fold
NMS ↔ Tribe-Caste	NMS worldview keeps tribes distinct from caste; as NMS weakens, tribes move towards caste pole of continuum
Sacred Complex ↔ NMS	Both are Vidyarthi's frameworks; Sacred Complex = civilisational/urban; NMS = tribal/forest. Complementary lenses
Parochialisation ↔ Jagannath	Tribal deity at Puri → Vishnu (universalisation); Vishnu visualised locally with wood by tribal artisans (parochialisation)

QUICK REVISION CHEAT SHEET

Topic	Main Points (Keywords)	Key Scholars	Examples	Key Case Studies	spirit types; NMS=constant even as content changes	V.S. Sahay (1981), Morab, Mann, Verrier Elwin	sacred groves; Sarhul festival
Jajmani System	Hereditary service exchange; Jajman-Kamin; agriculture-based; 6 features (PH-GSPR); ritual; declining due to state, tech, political mobilization	Wiser (1936), Oscar Lewis (1958), N.S. Reddy, Harold Gould (1972)	Karimpur village; Rampur village; Thakur family 10-caste ritual; safety razors, bore wells	Lewis's Rampur study — exploitation angle; MGNREGA replacing patronage	Source: Sarathi IAS Anthropology Foundation — L-49, Nataraj Sir 🖋️ = handwritten class additions Prepared for UPSC CSE 2026		
Tribe-Caste Continuum	Gradual range; no sharp boundary; Redfield's continuum; Caste=organic/hierarchical, Tribe=segmentary/egalitarian; Hinduisation	Redfield, Hutton, Beteille, Bailey, Surajit Sinha, Ghurye (1943), N.K. Bose (1941), Orans (1965)	Onge-Sentinelese (isolated) → Bhumiij (assimilated); Bhils & Parvati's curse; Jenu-Kuruba elephants	Ekalavya-Drona (unequal interaction); Bhima-Hidimbi (integration); Gujjar ST demand			
Great & Little Tradition	GT=elite/formal/textual; LT=folk/oral/local; interdependent; sacred specialists mediate; Dube's multipolar critique (6 types)	Redfield (1956), S.C. Dube (1965), Mandelbaum	Gita/Ramayana=GT; folklore=LT; Varanasi/Gaya=GT centres; Bhangra=regional; Tilak's Ganesh=national	Jagannath Puri — tribal deity → Vishnu; Goddess cults absorbed into Puranic framework			
Universalisation & Parochialisation	LT → GT (universalisation); GT → LT (parochialisation); circular not just bidirectional; Marriott at Kishangarhi	McKim Marriott (1955), Milton Singer	Gobardhan puja (parochialisation); Raksha Bandhan from Saluno (universalisation); Theyyam-Kerala	Ramayana circular movement: folk → Valmiki → Tulsidas → Ram Lila			
Sacred Complex	3 components: GPS (Geography, Performances, Specialists); pilgrimage integrates GT-LT; combination-continuity-compromise; secular dimension added	Vidyarthi (1961), Saraswati, Jha, Bharati, Sopher, Bharadwaj, Narayan, Patnaik, Narayana Reddy	Gaya Shradha; Gayawal Brahmins; Tirumala (secular+sacred); Kashi; Janakpur (Nepal)	Kashi Vishwanath Corridor; PRASAD Scheme; Char Dham Highway			
NMS Complex	Nature-Man-Spirit constant interaction; Maler tribe; Khallu (shifting cultivation); 4	Vidyarthi, P.K. Singh (1981 restudy),	Maler spirits (Gossaiyan); Nicobarese blood sacrifice; Khasi	Dongria Kondh vs. Vedanta (Niyamgiri 2013 referendum); Maler relocation & spirit anger
