

L-51: Indian Society — Comprehensive Notes

Sarrthi IAS | Nataraj Sir | Paper 2 (Ch 4, 5.2, 5.3, 5.3a) + GS1 | UPSC CSE 2026

Sanskritization

Westernization

Modernization

Minorities

Growth of Anthropology

Panchayati Raj

Media

 **MASTER MAP: Processes** (Sanskritization/Westernization/Modernization) → **Subjects** (Minorities) → **Study** (Growth of Anthropology) → **Agents** (PRI + Media) | All connected through *social change in India*

Inter-linkages: S ↔ W (accelerate/weaken each other) • Media = new agent of S (online poojas) & M (Digital India) • PRI+Media empower minorities & tribals • Desanskritization + PESA + Media = triple tool for tribal assertion • Anthropology Phase 3 scholars studied all these processes

TOPIC 1: SANSKRITIZATION (Ch 5.3a)

M.N. Srinivas (1952) — "*Religion and Society among the Coorgs of South India*"

"Process by which a low caste/tribe takes over customs, rituals, beliefs, ideology & lifestyle of a higher caste, particularly **twice-born (dwija)** caste."

Core: Caste system **never so rigid** that status cannot be altered.

Mechanism & Features

- Mediation by **local dominant castes** → Brahmin/Kshatriya/Vaishya models depending on region
- Cultural Emulation**: Give up non-veg, alcohol, animal sacrifice; don sacred thread; abandon pig sacrifice at weddings 🖋️; adopt dowry replacing bride price
- Cultural Emulation → **Cultural Erosion** (loss of indigenous practices)

Regional Examples

Region	Community	Action
Bihar	Rajwars (SC), Koyaris (BC), Dusadh (SC)	Claim Kshatriya/Kushwaha/Gahlout status
Maharashtra/Rajasthan	Mahar, Pasi	Abandon polluting occupations
Central India	Gonds, Cheros, Sudha Saoras, Paudi Bhuiyans	Undergo Sanskritization
Rajasthan/Bihar/UP	Meena, Santhal, Munda, Jounsari, Khasas, Tharu	Absorbed into Hindu fold

Impact on Women & Family

- Women's autonomy & freedom to choose partner = **LOST**
- Shifts to orthodox joint family, paternal authority, monogamy
- Dowry replaces bride price** — a regressive shift
- Lower castes (ironically more liberal) become **conservative**

📌 Nangeli of Travancore

Lower caste women (Nadars, Ezhavas) paid **mulakkaram** (breast tax) to cover upper bodies. **Nangeli** cut off breasts in protest → died. Men: **talakkaram** (head tax), **meeshakkaram** (moustache tax) 🖋️. Shows economic instruments enforcing hierarchy.

The Paradox 🖋️

- Prosperous lower castes claim **higher status** via Sanskritization BUT **fiercely retain "backward" status** for reservations → "Modern India is full of contradictions"

Harold Gould (1988)

Prime motive = **repressed hostility** — victims **seize control** of the system rather than reject it; expiate frustrations on the same battlefield where they acquired them.

New Agents of Sanskritization 🖋️

- Newspapers, microphone, radio/TV** = new agents
- Booking Tirupati pooja online → strengthens Sanskritization
- Village festivals increasingly Sanskritized
- Tribal absorption: tribe undergoing S → becomes caste (tribe-caste continuum)

Variants

Variant	Meaning	Key Example
Resanskritization	Moves away, then returns to Sanskritic practices	Lingayats, Karnataka : Basavanna's radical bhakti (12th C) rejected orthodoxy → later re-adopted idol worship/temples. Also: Arya Samaj later generations.
Desanskritization	Deliberately abandons Sanskritic; revives indigenous	Ramnamis (Chhattisgarh) : tattooed "Ram", rejected priestly mediation. Sarna Revivalism (Jharkhand) : Santhal/Munda/Ho/Oraon reject Hindu deities. Adi Dharma (Bengal) : Dalits reclaim identity outside Hinduism.

Scholars — Complete

Scholar	Key Argument
M.N. Srinivas	Coined; multiple models depending on dominant caste
Milton Singer (1968)	Multiple models; mobility now = political participation
Yogendra Singh	Extended to varna; manifests repressed inter-class hostility
William Rowe	Less functional today vs political participation
Harold Gould (1988)	Prime motive = repressed hostility; seize control

Takeaway: Gains are **symbolic not structural**. Contemporary India uses education, politics, law for dignity beyond Sanskritic models.

🧐 Anthropological Significance

- Srinivas used **participant observation** (Coorgs) — showed fieldwork reveals dynamics invisible to surveys
- Challenges **unilineal evolution** — change is cyclical, multi-directional (re-/de- prove this)
- Gender lens**: Caste mobility comes at cost of women's autonomy — anthropologists document this trade-off
- Today**: Jat/Patel/Maratha agitations = modern paradox; Sarna code demand = desanskritization; re-sanskritization via yoga/Ayurveda revival

TOPIC 2: WESTERNIZATION (Ch 5.3a)

M.N. Srinivas: All cultural changes & institutional innovations due to **150+ years of British rule**.

Wider plane: scientific approach, materialism, individualism, liberalism, humanism, equality, egalitarianism, rationalism.

Impacts on India

Domain	Impact
Scientific/Educational	Modern schools, colleges, universities, scientific institutions
Political	Nationalism, modern leadership, democratic institutions, new political culture
Caste & Family	Lessening caste rigidity, joint family disintegration, reform movements
Economic	Cottage industry decline, commercial crops, new land management
Social Values	Democracy, equality, social justice, uniform administration

- Humanitarianism/rationalism → **abolition of sati, widow remarriage**; reformers like **Raja Ram Mohan Roy**

Link with Sanskritization (Srinivas)

- Accelerates S:** Railways/post/newspapers → pilgrimages, caste meetings, religious propaganda spread wider
- Weakens S:** Highly Westernized → "world of class not caste"; drop caste names, intermarry, give up sacred thread

Harold Gould

Once fully Sanskritized, cannot rise further → higher castes used Western lifestyles as **alternative distinction**.

Three Global Views

View	Scholar	Argument
Conflict	Samuel Huntington	Cultural clash West vs Rest. 3 responses: isolation, band-wagoning, balancing
Optimistic	Kishore Mahbubani (<i>New Asian Hemisphere</i>)	Global civilization emerging; Western influence unraveling as East rises
Critical	Edward Said (<i>Orientalism</i> , 1978)	W = colonial domination; knowledge & power intertwined. Balfour: Egyptians "needed" British guidance

Indian Context

- John McLane:** Nationalist movement drew from Western ideas of democracy/rights
- B.R. Nanda:** Nehru called himself "the last Englishman to rule India"
- Gave India ideological foundation for nationalism, democracy, social reform

5 Limitations

- Over-generalised** — clubs railways + dress + democracy under one label
- Eurocentric bias** — assumes Western = progressive
- Neglects selective adoption** — accepted science, resisted Christianization
- Ignores resistance** — Swadeshi, revivalist movements
- Static view of West** — treats it as fixed, ignores its contradictions

Anthropological Significance

- Said's Orientalism** reshaped anthropology — the observer's "gaze" matters; fieldwork is never neutral
- Selective Westernization:** India adopted democracy but retained caste-based personal laws — anthropologists study this
- Today:** Digital colonialism (Silicon Valley platforms); yoga diplomacy as counter-assertion; re-sanskritization trend = backlash

🧠 S vs W vs M

S = Status within hierarchy (symbolic) | W = Whole cultural import (value-loaded, Eurocentric) | M = Mind-change (rational, value-neutral)

TOPIC 3: MODERNIZATION (Ch 5.3a)

Eisenstadt

"Process of change towards social, economic, political systems developed in W. Europe & N. America (17th-19th C), later spread globally."

Yogendra Singh

"Symbolizes a **rational attitude** towards issues — evaluation not from particularistic point of view."

- Rests on **progress** — science, technology, institutions improving human condition
- Decline of feudalism, superstition, rigid dogmatism
- Promotes rationality, equality, democracy, secularism

Historical Roots

Phase	Key Point
Neolithic Revolution (10,000 BCE)	Ploughs → productivity → permanent villages → surplus → specialization → organized societies
Industrial Revolution (18-19th C)	Steam/electricity/factory; dismantled agrarian hierarchies; Denmark/NZ = "rural factories"; American/French revolutions → democracy
Max Weber (1904)	"Protestant Ethic & Spirit of Capitalism" — rational discipline, this-worldly orientation → industrial capitalism

Modernization vs Westernization

S.C. Dube (1988)

"Modernization is **less value-loaded** than Westernization. Emphasizes rational/scientific progress **without threatening cultural identity**."

W = M (overlap)	W ≠ M (distinction)
Railways, education, constitutional democracy	Blind imitation of fashion, fast food, suits in Indian summers 🖋️

- **M beyond West:** Green Revolution (from Mexico/Philippines); Arya Samaj, Brahmo Samaj, Gandhi's Khadi/Panchayati Raj = indigenous modernization

Modernized Personality — Daniel Lerner

Feature	Example
Empathy (see from other's perspective)	Ambedkar's temple entry; Saudi dress code relaxation
Mobility (geographical + social)	Ambedkar's rise to Constitution framer; Saudi women driving
High Participation (political/economic/social)	Dalit mobilization; Saudi Vision 2030 women in workforce

Indian Model

S.C. Dube (1974)

"No standard model of modernization. Developing societies can adopt a model of **their own choice**."

- India's path: **democracy + secularism + social justice**
- **DPSP Art 48:** modernizing agriculture/animal husbandry
- Challenges: regional imbalances, corruption, uneven diffusion

Contemporary Issues

- **NCRB 2021:** 74 deaths from witchcraft/human sacrifice → modernization gaps
- **Narendra Dabholkar** — anti-superstition law campaign (assassinated 2013) 🖋️
- Women's mosque entry demands; reformers branded "anti-religion"

5 Limitations

- Not uniform/linear (IT hubs ↔ witchcraft deaths coexist)
- Neglects inequality (Green Revolution widened divides; tribals left behind)
- Resistance from conservatism (reforms branded "Western")
- Overemphasis on progress (ignores environmental/alienation costs)
- Alternative modernities overlooked (Gandhian decentralization, tribal models) 🖋️

Anthropological Significance

- **Multiple modernities thesis:** Every society modernizes differently — India's path through caste-democracy is unique, not "failed West"
- **Development critique:** Dams/mining justified as "modernization" displace tribals — anthropologists document human costs
- **Today:** Aadhaar, UPI, DBT = indigenous modernization without Westernization; NCRB witchcraft data shows uneven penetration

TOPIC 4: RELIGIOUS & LINGUISTIC MINORITIES (Ch 5.2)

A. Religious Minorities

Group	Pop (mn)	%
Hindus	966.3	79.8%
Muslims	172.2	14.2%
Christians	27.8	2.3%
Sikhs	20.8	1.7%
Buddhists	8.4	0.7%
Jains (notified 27 Jan 2014)	4.5	0.4%

Constitutional Provisions

Article	Provision
Art 29	Protection of interests (distinct language/script/culture)
Art 30	Right to establish & administer educational institutions
Art 350-A	Mother tongue instruction at primary stage
Art 350-B	Special Officer for linguistic minorities (7th Amendment, 1956)

Lord Acton

"The most certain test of a free country = **security enjoyed by minorities.**"

- "Minorities" appears **only 4 places** in Constitution; **no definition** given
- Initially 5 notified: Muslims, Christians, Sikhs, Buddhists, Zoroastrians → **Jains added 2014**

7 Problems

Problem	Key Data/Example
Identity	Difficulty adjusting with majority
Security	Insecurity when relations strained
Equity	UNDP MPI 2018: "Every 2nd ST, 3rd Dalit & Muslim = poor"
Communal Tension	Muzaffarnagar 2013; Godhra 2002 (69 killed → violence)
Under-representation	Sachar: Muslims 14% pop → 2.5% bureaucracy, 5% politics
Politicization	Karnataka Hijab 2022 (HC upheld ban; Malala/HRW criticized)
Fear Mongering	CAA 2019 → Shaheen Bagh women = "anti-national" ✍️

Karnataka Hijab (2022)

Muslim students denied entry → saffron counter-protest → 15 March 2022: HC upheld ban (hijab not essential religious practice). Criticized by Malala & HRW. Shows religious symbols as identity contestation sites.

Ranganath Mishra Commission — Recommendations

- 10% reservation** Muslims + **5%** other minorities in govt jobs
- In 27% OBC quota → **8.4% sub-quota** (6% Muslims + 2.4% others)
- Delink SC from religion** — abrogate 1950 SC Order (excludes Muslims/Christians from SC net)
- Morarji Desai Residential Schools** for minorities at taluk level
- Ashwini Upadhyay PIL:** Court said no new minority groups; NCM reduce list. Approach = "assimilation" but Constitution wants **integration**

B. Linguistic Minorities

People whose **mother tongue differs from majority in the state**. Determined **state-wide** (not nationally).

- DAV College vs Punjab (1971):** Linguistic minority = at least **spoken language** (no script needed)
- TA Pai Foundation vs Karnataka:** Status in **context of states**, not India

6 Problems

- No funds** for minority language education (XAXA Committee: low PVTG literacy, no tribal language teaching)
- Language diversity** — dominance of major languages threatens smaller ones
- Grievance redressal** — forced to use majority's language
- Social discrimination** — outsiders in professional settings
- Cultural erosion** — unique identities eroded
- Economic disparities** — opportunities linked to major language proficiency

Anthropological Significance

- Anthropologists document disappearing minority cultures/languages (Asur: 7000 speakers) — preservation role
- Identity = **contextual not absolute** — SC ruling (2024-25): minority status is "state-dependent" (Hindus can be minority in some states)
- Integration vs Assimilation:** Anthropology favors integration (retain identity + participate) over assimilation
- 197 Indian languages endangered (UNESCO) — fieldwork = primary recording method

TOPIC 5: GROWTH OF ANTHROPOLOGY IN INDIA (Ch 4)

4 Phases: Formative (1774-1919) → Constructive (1920-49) → Analytical (1950-90) → Evaluative (1990+)
Mnemonic: "**FACE**" of Indian Anthropology

Phase 1: Formative (1774–1919) — Documentation

- Emphasis on **tribal life & diversity of customs**
- Handbooks, ethnographies, gazettes on tribes/castes published
- Revenue reports of **Dalton, Buchanon, Lord Baden Powell** 
- **1774: Sir William Jones** founded Asiatic Society of India (→ Asiatic Society of Bengal 1784; started journal)
- **H.H. Risley:** *Tribes & Castes of Bengal* (1891); Head of Census; ethnographic surveys
- **1912 — S.C. Roy:** "*Munda and Their Country*"; wrote on other Central Indian tribes; "Father of Indian Ethnography"

Phase 2: Constructive (1920–1949) — Institutions

- Anthropology in **Bombay University (1919)**, PG at **Calcutta (1920)**
- "**Man in India**" journal (1921) — editor: S.C. Roy
- **25th Indian Science Congress (1938, Calcutta):** Theme "Anthropology in India" — first review of anthropological research (joint ISC + British Association)
- **Verrier Elwin (1939):** "*The Baiga*" — tribes should be **left alone** (Isolationist approach)
- **1945: Anthropological Survey of India (AnSI)** established; 1st Director: **B.S. Guha**, Calcutta

Phase 3: Analytical (1950–1990) — Theory

- Interaction with **American anthropologists** — collaborative works
- **Shift:** Descriptive studies of preliterate societies → analytical studies of **complex societies**
- Foreign anthropologists came; villages studied became famous
- **Village study monographs** in 1950s-60s (Redfield, Singer, Marriott)
- New concepts; distinct research methodologies developed
- **L.P. Vidyarthi:** sacred complexes, **nature-man-spirit complex**

Phase 4: Evaluative (1990–Present) — Applied

- New subfields: **Medical Anthropology, Religion, Development Studies, Industrial Anthropology, Psychological Studies**
- Research areas: tribal identity/integration, tribal demography, vanishing cultures
- Contributions to: **Action Research, Folk-lore, Power Structure/Leadership studies, Anthropology of Religion**

Key Scholars — Timeline

Scholar	Contribution	Phase
Sir William Jones	Founded Asiatic Society (1774)	1
H.H. Risley	Tribes & Castes of Bengal; Census; ethnographic surveys	1
Dalton, Buchanon, Baden Powell	Revenue reports 	1
S.C. Roy	Munda monograph (1912); Man in India (1921)	1-2
Verrier Elwin	The Baiga (1939); isolationist approach	2
B.S. Guha	1st Director AnSI (1945)	2
Redfield, Singer, Marriott	Village studies; Great/Little Tradition	3
L.P. Vidyarthi	Sacred complexes; nature-man-spirit complex	3

Anthropological Significance

- Moved from **colonial tool** (Risley's racial classification → divide) to **decolonized discipline**
- AnSI's "People of India" (K.S. Singh): 4635 communities documented — used in SC/ST identification policy
- Anthropologists now on **EIA panels, rehabilitation committees, PVTG planning cells** — directly shaping policy
- Phase 4 = **digital anthropology** (social media, AI ethics) as newest frontier

TOPIC 6: PANCHAYATI RAJ & SOCIAL CHANGE (Ch 5.3)

Social Change — Definitions

- **Anderson & Parker:** Alteration in structure & functioning of societal forms
- **Surinder S. Jodhka:** Changes in values, institutions, and practices of society

Panchayat = assembly (*ayat*) of five (*panch*); **Raj** = rule. Oldest local government in subcontinent. Leader = Mukhya/Sarpanch. Type of **direct democracy**.

Three-Tier Structure

Level	Body
Village	Gram Panchayat
Block	Panchayat Samiti
District	Zilla Panchayat

PRI as Tool of Social Change

1. Leadership from Less Privileged

- Gram Sabha = all voters → includes marginalized
- Reservation for SCs/STs as chairpersons
- **Bihar = first to reserve 50% seats for women** → 15 others followed (Uttarakhand, HP, MP, Kerala, Tripura, Maharashtra) ✎
- Challenge: "**Sarpanch pati**" — husband calls shots (PM Modi, National PR Day 24 April) ✎

2. Tribal Rights — PESA

PESA = Panchayats Extension to Scheduled Areas Act. Tribal customary rights, cultural rights, language, identity, land/water/forest/mineral rights. Right to **maintain own institutions** & pursue development per own aspirations.

3. Other Initiatives

- Health: childhood malnutrition, pregnant women nutrition, maternal deaths prevention
- Social: farmer welfare, open-defecation-free, women's toilets, social peace

Case Studies

Case	Location	Achievement
Alcohol Ban	Bhim tehsil, Rajsamand (2015)	Women campaign → liquor shops closed. Rule: 51% voters can close a shop
Bamboo Bridge	Latak, Dhemaji, Assam	300-house village built flood bridge from own funds
Social Welfare	Digampur, West Bengal	Water supply, garbage collection, organic handicrafts → GPVY 1st prize
Environment	Odisha GPs	Plantations 2020-21 for green cover/income (critiqued as top-down)
Social Issues	ACNielsen ORG-MARG	PRIs addressing child marriage, gambling, alcoholism

Anthropological Significance

- Anthropologists study **traditional authority vs PRI authority** conflicts — transition ongoing
- PESA needs anthropological documentation of tribal customs for proper implementation
- Ethnography reveals "Sarpanch pati" — formal power ≠ actual decision-making
- **Recent:** PPC 2025-26 (Adi Karmayogi Abhiyaan); SabhaSaar AI recording Gram Sabhas in 13 languages; SVAMITVA: 2.75 crore property cards via drone surveys; National PR Day 2026 theme: "Sashakt Panchayat, Sarvangeen Vikas"

TOPIC 7: MEDIA & SOCIAL CHANGE (Ch 5.3)

Marshall McLuhan

"The medium is the message" — media shapes **how people think and act**, directly influencing social change.

- **Print:** newspapers, magazines, pamphlets | **Broadcast:** radio, TV | **Digital:** internet, social media

7 Positive Impacts

Impact	Example
Voice to people	Dongria Khond vs Vedanta (Niyamgiri) → SC order 18 Apr 2013: mining only if tribals agree
Awareness of wrongs	Honour killings, khap panchayats, lynchings → mobilised action
Uplifting marginals	Ghasi (SC, Odisha); FRA 2006 loopholes; #MeToo , #BlackLivesMatter
Language revival	Asur Community — mobile radio for Asur language (UNESCO endangered, ~7000 speakers). Led by Sushma Asur
Women empowerment	Subhash study: "Impact of Mass Media on Women" (Gulbarga District)
Democracy	Informed choices; "checking function" on elected reps
Social justice	Educating, questioning caste discrimination

7 Negative Impacts

Impact	Example
Socialization dangers	TV fixation; reduced family time; generation gap
Fake news	Inter-community tensions; WhatsApp lynchings
Yellow Journalism	CJI N.V. Ramana : media = " kangaroo courts " — biased, agenda-driven
Election distortion	Paid news → unfree/unfair elections
Body image	Ideal body images → mental health; junk food promotion
Criminal justice	Bhima Koregaon (2018) : motivated arrests of govt critics
Trial by media	Disha case (2019) : Media rallied "encounter" → 4 accused killed 6 Dec 2019

Dongria Khond / Niyamgiri (2013)

Tribe opposed Vedanta bauxite mining in sacred hills. Media attention → SC: mining only with Gram Sabha consent. 12 Gram Sabhas rejected mining. **First time FPIC upheld over corporate interests via media pressure.**

Asur Community — Language Revival

Austroasiatic tribe (Jharkhand); ~7000 speakers; UNESCO endangered. **Sushma Asur** uses mobile radio for songs/stories in Asur language. Shows how new media can reverse language death.

Anthropological Significance

- **Media anthropology** = growing subfield studying how media constructs reality (whose voice amplified, what's invisible)
- Media = new agent of **Sanskritization** (TV Ramayana, online poojas) AND **Modernization** (Digital India)
- Subaltern communities can now **self-represent** (Asur radio) — shifts observer-observed power dynamic
- Trial by media (Disha) shows how media can undermine rule of law — ethical parallel to "do no harm" principle

Conclusion: Media = **mirror** + **motor** of social change. Informs, empowers, challenges hierarchies; also shapes new values. Despite fake news risks, central driver of change in contemporary society.

QUICK REVISION CHEAT SHEET

Topic	Keywords	Scholars	Examples	Case Studies
Sanskritization	Cultural emulation → erosion; symbolic not structural; dowry replaces bride price; dominant caste models; paradox; new agents (media/online); tribe → caste	Srinivas (1952), Gould (hostility), Singer (political participation), Yogendra Singh (varna), Rowe	Bihar castes claiming Kshatriya; Gonds/Meena; Tirupati online; breast tax	Nangeli; Lingayats; Ramnamis; Sarna Revivalism
Westernization	150+ yrs British; value-loaded; accelerates+weakens S; 3 global views; 5 limitations; gave nationalism/democracy	Srinivas, Huntington (clash), Mahbubani (Asian rise), Said (Orientalism), McLane, Nanda, Gould	Ram Mohan Roy; Nehru "last Englishman"; Swadeshi; higher castes → Western distinction	—
Modernization	Rational; less value-loaded; 3 roots; Lerner 3 features; Indian model (democracy+secularism+justice); not linear; alternative modernities	Eisenstadt, Yogendra Singh, Dube (1974/1988), Lerner, Weber (1904), Dabholkar	Green Revolution; Ambedkar; Saudi V2030; NCRB 74 deaths; Digital India/UPI	—
Religious Min.	6 notified (Jains 2014); Art 29/30/350A/B; 7 problems; Sachar 2.5%; Mishra 10%+5%; delink SC; only 4 places in Constitution	Lord Acton, Sachar Committee, Ranganath Mishra Commission	Muzaffarnagar 2013; Godhra 2002; CAA 2019; Shaheen Bagh; MPI 2018	Karnataka Hijab 2022
Linguistic Min.	State-level; spoken language enough; 6 problems; Art 350A/B; 7th Amendment 1956	XAXA Committee, DAV College 1971, TA Pai Foundation	Tribal language death; English medium shift; 197 endangered (UNESCO)	—
Anthropology Growth	4 phases FACE; Asiatic Society 1774; AnSI 1945; Man in India 1921; descriptive → analytical → applied	William Jones, Risley, S.C. Roy, Elwin, B.S. Guha, Vidyarthi, Redfield/Singer/Marriott	Munda monograph; 25th ISC 1938; People of India (K.S. Singh); village studies 1950s	—
Panchayati Raj	3-tier; direct democracy; Bihar 50% women first; Sarpanch pati; PESA tribal rights; Gram Sabha inclusive	Anderson & Parker, Jodhka	PPC 2025-26; SabhaSaar AI; SVAMITVA drones; "Sashakt Panchayat" 2026	Bhim tehsil alcohol; Latak bridge; Digampur GPVY
Media	"Medium=message"; 7 positives; 7 negatives; mirror+motor; kangaroo courts; trial by media	McLuhan, CJI Ramana, Subhash (Gulbarga), Sushma Asur	#MeToo; #BLM; Asur radio; Ghazi; paid news; WhatsApp lynchings	Dongria/Niyamgiri SC 2013; Disha case 2019; Bhima Koregaon 2018

"SWiM-MA-PM"

Sanskritization + Westernization + Modernization = Processes | Minorities = Subjects | Anthropology = Study | PRI + Media = Agents

Inter-linkages: S ↔ W accelerate/weaken • Media = new agent of S (online poojas) & M (Digital India) • PRI+Media empower minorities/tribals • PESA connects PRI with tribals • Dongria case connects media+tribal rights • Desanskritization + PESA + Media = triple tribal assertion tool • Phase 3 anthropologists studied all processes
