

# L-67 TRIBAL INDIA — CLASS NOTES

Sarrthi IAS | Nataraj Sir | Paper 2 — Units 7.1, 8.1, 8.2, 9.1, 9.2, 9.3 |  = Handwritten annotation from class

## 8.1 — IMPACT OF HINDUISM ON TRIBAL SOCIETIES

### HINDUISM & TRIBES — Overview

- 90%+ tribals directed towards Hinduism
- Peasantization (N.K. Bose)
- Tribe-Caste Continuum
- Kshatriyaization — form of Sanskritization
- Hinduised groups: Bhils, Bhumij, Gonds
- Gotras more totemistic than Vedic

 **Surajit Sinha** — Studied Bhumij tribes → coined "**Tribe-Rajput Continuum**" (tribes follow Rajput Model)

 **S.K. Srivastav** — Studied **Tharu tribe** (accepted as Kshatriya through Kshatriyaization)

 **D.N. Majumdar** — Studied **Khasa tribe** (accepted as Kshatriya); defined "tribe"

**N.K. Bose** — Coined "**Peasantization**" — tribals moving from forest to settled agriculture under Hindu contact

**M.N. Srinivas (1952)** — **Sanskritisation** — lower groups adopt customs of upper castes for upward mobility

**Bhil Tribe** | *Rajasthan, Gujarat, MP*

Believe Goddess Parvati was a Bhil; cursed by Shiva to poverty but given Vardaan — theft for livelihood invites no sin. Some sub-tribes call themselves "**thieves of Mahadev.**"

### Positive Impacts

| Impact                       | Details                                                                                |
|------------------------------|----------------------------------------------------------------------------------------|
| Cultural Integration         | Through Sanskritisation — Gonds, Bhils, Oraons adopted Hindu customs for higher status |
| Civilizational Incorporation | Tribal deities absorbed: Gond deity Pharsa Pen → Shiva; Santhal Marang Buru → Mahadeo  |
| Settled Agriculture          | Peasantization (Bose) — Bhumij, Bhils moved from jhum to settled farming               |
| Literacy & Authority         | Raj Gonds used Sanskrit titles (Raja/Thakur) to legitimize political authority         |
| Religious Tolerance          | Polytheistic worldview: Navakhani (Oraons) & Holi (Bhils) celebrated jointly           |

### Negative Impacts

| Impact                  | Details                                                                                                                                                                                             |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Decline of Institutions |  <b>V.R. Elwin</b> — Youth dormitories Ghotul (Muria Gonds), Dhumkuria (Oraons) declined under Hindu moral codes |
| Emergence of Dowry      | Bride price → dowry among Ho, Munda, Gond — reversed egalitarian gender norms                                                                                                                       |
| Child Marriage          | Bhil, Gond: child marriage encouraged, widow remarriage prohibited                                                                                                                                  |
| Caste Hierarchies       | Raj Gonds developed internal stratification resembling caste system                                                                                                                                 |
| Economic Dependence     | Lambadi (Banjara) now employ Brahmin priests — economic dependence on outsiders                                                                                                                     |
| Cultural Autonomy Loss  | Tribal deities subordinated as Hindu manifestations; myths reinterpreted                                                                                                                            |

## 8.1 — IMPACT OF CHRISTIANITY ON TRIBAL SOCIETIES

### CHRISTIANITY & TRIBES — Overview

- Spread during colonial period
- 2nd largest religion among tribals
- Highest in NE India
- Missionaries = first welfare agency
- Education, healthcare, scripts
- Loss of traditional institutions
- Revivalist movements in response
- Religious layering / syncretism

 **Tanka Bahadur Subba** — Conversions among tribals motivated by **education and welfare**, not just spiritual reasons

 **K.N. Sahay** — Christian Oraons developed **sense of superiority** over non-Christians; missionaries were **earliest welfare workers**

 **Nirmal Minz** — Christian Oraons still **honored ancestral spirits** despite conversion

 **Andre Beteille** — Conversion leads to **reformulation of identity**, not erasure

### Positive Impacts

| Impact                              | Details & Examples                                                                                                                                       |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Tribal Welfare Agency</b>        | First organized welfare before state schemes — literacy, healthcare in remote forests                                                                    |
| <b>Education &amp; Scripts</b>      | Mizoram: Rev. Lorrain & Savidge (1894); Nagaland: American Baptist Mission (1872); Jharkhand: Rev. Hoffmann (Munda grammar), Bodding (Santal dictionary) |
| <b>Westernization</b>               | Nagaland: headhunting disappeared; Arunachal: Nyokum & Mopin became cultural events                                                                      |
| <b>Harmful Practice Elimination</b> | Orphanages replaced practice of burying baby with dead mother                                                                                            |
| <b>Health &amp; Hygiene</b>         | Dispensaries, hospitals, vaccination, maternal care in Arunachal & Jharkhand                                                                             |
| <b>Alcohol Prohibition</b>          | Young Mizo Association (YMA) campaigns against rice beer (Zu)                                                                                            |
| <b>Syncretism</b>                   | Jharkhand: Christian Santals & Oraons celebrate Karma & Sohrai — "religious layering"                                                                    |

### Negative Impacts

| Impact                        | Details                                                                                                                                                                 |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Ethnocentric Approach</b>  | Tribal faiths labelled "primitive" → erosion of customs, songs, institutions                                                                                            |
| <b>Superiority Complex</b>    |  K.N. Sahay — Christian Oraons of Chotanagpur felt superior → fractured tribal unity |
| <b>Demographic Change</b>     | Arunachal: <5% (1970s) → ~80% (2011); Nagaland: ~90% Christian; Mizoram: almost 100%                                                                                    |
| <b>Loss of Institutions</b>   | Morung (Nagas) & Ghotul (Gonds) declined; Mundas/Oraons stopped Karma & Sarhul                                                                                          |
| <b>Revivalist Resistance</b>  | <b>Donyi-Polo</b> (Arunachal); <b>Sarna Dharma</b> (Central India); <b>Gond Mahasabha</b> (Koya Punem)                                                                  |
| <b>Political Implications</b> | IFCSAP: demands delisting converted Christians from ST benefits; Nagaland/Mizoram: Christianity → ethnic nationalism                                                    |

## 8.1 — IMPACT OF BUDDHISM ON TRIBAL SOCIETIES

### BUDDHISM & TRIBES — Overview

- ~0.5% of tribal population
- Linked to Mauryan/Kushan era, Ashoka
- Buddhism = way of life, non-dogmatic
- NW & NE Himalayan regions
- Symbiosis with tribal rituals
- Gompas & Lamas

 **C. von Furer-Haimendorf (1983)** — Buddhist converts in Arunachal **did not renounce tribal rituals**

Case Studies: Buddhism & Tribes

| Tribe                | Region               | Key Finding                                                                                          |
|----------------------|----------------------|------------------------------------------------------------------------------------------------------|
| Bhutia               | Sikkim, Darjeeling   | Vajrayana Buddhism (17th-18th c.); Losoong & animistic dances coexist                                |
| Lepcha               | Sikkim, NE Himalayas | Bon-like healing rituals & ancestor worship alongside Buddhist ceremonies — syncretism               |
| Chakma               | Arunachal, Mizoram   | Theravada Buddhists; still worship Lakshmi & forest spirits; blend Buddhist codes with customary law |
| Monpa/Sherdukpen     | Arunachal Pradesh    | Mahayana; Sherdukpen worship tribal deities alongside Lamas; Bon elements among Monpas               |
| Brokpa/Changpa/Balti | Ladakh               | Pre-Buddhist mountain-spirit worship (Lha/Yul-lha) continues alongside Mahayana                      |

**Conclusion:** Buddhism integrated with indigenous cosmologies **rather than replacing them**. Non-dogmatic nature → **syncretic evolution**. Limited but significant impact.

8.1 — IMPACT OF ISLAM ON TRIBAL SOCIETIES

ISLAM & TRIBES — Overview

→ Dogmatic nature → limited penetration

→ Spread via Sufi saints/preachers

→ Key groups: Siddis, Gujjars, Bakarwals

→ Lakshadweep — unique matriliney case

→ Shift to patrilineal norms

→ Islamisation of life-cycle rituals

-  **K.S. Singh** — Islam came to Arabian Sea islands (Lakshadweep) from **Southern Arabia**

 **Leela Dube & Kutty (1969)** — Studied **matrilineal concept in Lakshadweep**

 **Aiyappan** — Argued Lakshadweep islanders are **not tribals**

 **Hanson** — Described **duolocal residence pattern** in Lakshadweep

Muslim Tribal Group Profiles

| Group             | Region             | Islamic Identity + Tribal Retention                                           |
|-------------------|--------------------|-------------------------------------------------------------------------------|
| Bakarwal & Gujjar | J&K, Ladakh        | Nomadic, Sunni Muslim, ST since 1991; transhumance & Gujari language retained |
| Siddi             | Gujarat, Karnataka | African origin; Muslim but retain African music/dance (Goma/Dhamaal)          |
| Lakshadweep       | Lakshadweep        | Sunni Muslim but matrilineal; Taravad system; duolocal residence              |
| Van Gujjars       | NW Himalayas       | Pastoral, Sunni; marriage & seasonal movement follow traditional rules        |

Lakshadweep — Islam & Matriliney (Detailed)

- **Taravad** = matrilineal unit tracing descent from common ancestress (3-6+ generations)
- Birth in Taravad → right to share property (land, boats, buildings) through female line
- Male members have only **usufructuary rights**; father has no legal responsibility for children
- Islamic marriage adopted BUT **duolocal residence not given up** — spouses live in separate houses
- Islam provides easy divorce → **high frequency of divorce**
- **Current changes:** Gradual shift toward patriliney, nuclear families, male headship
- Matriliney background brought by nearest coastal people of **Kerala**

General Impacts of Islam

| Impact                  | Details                                                                       |
|-------------------------|-------------------------------------------------------------------------------|
| Patrilineal Shift       | Matrilineal/bilateral → patrilineal under Sharia inheritance                  |
| Islamisation of Rituals | Ancestor worship, spirit dances replaced by namaz, fasting, Islamic festivals |

|                         |                                                                       |
|-------------------------|-----------------------------------------------------------------------|
| Dual Marginalisation    | Gujjars/Bakarwals seen as inferior to Ashraf Muslims (Syeds, Pathans) |
| Decline of Folk Culture | Indigenous dances & practices declined sharply                        |
| Cousin Marriages        | Became preferential among converted tribes                            |

**Conclusion:** Tribes like Lakshadweep **adapted Islam within their own cultural frameworks** — blend of faith and indigenous identity.

---

## 8.2 — TRIBE AND NATION STATE

 **Lucy Mair** — Tribe as "**independent political division**" of a population

 **Eller** — Defined **nation** as community based on shared language, history, ethnicity, culture

 **Max Weber** — State maintains **monopoly on legitimate use of violence**

### Key Definitions

| Concept             | Definition                                                                                           | Example                      |
|---------------------|------------------------------------------------------------------------------------------------------|------------------------------|
| <b>Tribe</b>        | Territorial affiliation, endogamous, no specialization, ruled by tribal officers, united in language | Gonds, Bhils, Nagas          |
| <b>Nation</b>       | Community based on shared language, history, culture — collective identity                           | Kurds (nation without state) |
| <b>State</b>        | Centralized political organization with monopoly on legitimate violence (Weber)                      | India, France                |
| <b>Nation State</b> | State & nation congruent — common identity, culture, history                                         | France, Japan, Germany       |

### ILO Convention No. 169 — Criteria

| Category          | Subjective          | Objective                                                                     |
|-------------------|---------------------|-------------------------------------------------------------------------------|
| <b>Indigenous</b> | Self-identification | Descent from populations at time of conquest; retain own institutions         |
| <b>Tribal</b>     | Self-identification | Distinct social/cultural/economic conditions; regulated by customs/traditions |

**India's Special Case:** Division into indigenous vs settlers is **NOT valid** — cannot be divided into natives and non-natives.

### Challenges: Tribes vs. Nation States

- **Identity & Culture:** Distinct cultures, languages → conflicts over land rights & cultural preservation
- **Self-Governance:** Clashes with centralized authority; self-determination is a fundamental human right
- **Colonization Legacy:** History of resentment; nation-state must acknowledge historical injustices

## APPROACHES TO TRIBAL DEVELOPMENT

### 1. ISOLATIONIST — "Keep them apart" (Two Separate Bowls)

-  **Verrier Elwin** — '*The Baiga*' (1939); proposed "**National Park Theory**"
- **Criticism:** Tribes as "labs" for studies; keeps them underdeveloped
-  **Robert J. Miller** — US Indian reservation system → poverty, malnutrition, low standards
- USA 1868: President Grant tried assimilation via Christian clergy → violent resistance → abandoned

### 2. ASSIMILATIONIST — "Melting Pot"

-  **G.S. Ghurye & Thakkar Bapa** — Tribes = "backward Hindus" who would catch up by mingling
- **Criticism:** Ethnocentric; forced assimilation is unfair
- **Australia:** "Stolen Generations" (1910-1970) — ~100,000 Indigenous children removed from families
- Aboriginal Protection Act 1869 (Victoria) restricted movement; abolished in 1970s-80s

### 3. INTEGRATIONIST — "Salad Bowl" **India's Approach**

-  **Post-independent Verrier Elwin** — '*A Philosophy for NEFA*' (1957), foreword by **Nehru**
- Integrate while **retaining identity**; how/when/extent — **choice left to tribals**
- Adopted officially by Nehru as India's tribal policy

Tribal Panchsheel — 5 Principles (Nehru, 1957)

| # | Principle             | Explanation                                  |
|---|-----------------------|----------------------------------------------|
| 1 | Non-imposition        | Develop along own genius; nothing imposed    |
| 2 | Respect tribal rights | Land and forest rights must be respected     |
| 3 | Tribal leadership     | Train tribal youth for own administration    |
| 4 | Simple administration | Avoid over-bureaucratisation; people-centric |
| 5 | Human growth emphasis | Quality of life, not statistics              |

 **UNDRIP 2007** — Art. 8: Right not to be subjected to forced assimilation; Art. 5: Right to maintain distinct institutions while participating in national life

## 9.1 — HISTORY OF TRIBAL ADMINISTRATION

### British Era — Isolationist & Exploitative

| Rationale         | Details                                                                                                |
|-------------------|--------------------------------------------------------------------------------------------------------|
| Security          | Tribal groups seen as "explosive" (e.g., Santhal Uprising); isolation cut them from national movements |
| Economic          | Tribal belts rich in forests/minerals; Forest laws secured timber & land for British revenue           |
| Cultural          | British anthropologists portrayed tribes as "noble savages" needing protection                         |
| Missionary Access | Allowed missionaries; cultural penetration with political dominance                                    |

**Malers (Paharias) of Rajmahal Hills** | *Jharkhand*  
Among first tribes under separate admin. **Cleveland** established ring-fence; 1782: Hill Tract withdrawn from ordinary courts. **Regulation I of 1796** → **Daman-e-Koh** (indirect rule). Prototype for later special administrative areas.

### Key Tribal Uprisings

| Uprising                  | Year      | Cause                                                                                                                         |
|---------------------------|-----------|-------------------------------------------------------------------------------------------------------------------------------|
| Ho Mutiny of Singhbhum    | 1831      | Loss of land/forest rights, economic exploitation (zamindars, moneylenders), cultural displacement, political marginalization |
| Khond Uprising            | 1846      |                                                                                                                               |
| Santhal Rebellion         | 1855-56   |                                                                                                                               |
| Angami Naga Resistance    | 1879-80   |                                                                                                                               |
| Abor & Lushai Expeditions | 1880-1910 |                                                                                                                               |

### Major Legislative Measures

| Law                    | Year | Key Provision                                                           |
|------------------------|------|-------------------------------------------------------------------------|
| Scheduled District Act | 1874 | Exempt specified districts from conventional laws                       |
| Gol Act                | 1919 | Wholly excluded areas (Governor's authority) & Partially excluded areas |
| Gol Act                | 1935 | Continued excluded/partially excluded zones (Simon Commission)          |

### British Era vs. Post-Independence

| Dimension      | British Era                                | Post-Independence                               |
|----------------|--------------------------------------------|-------------------------------------------------|
| Approach       | Isolation & control                        | Integrationist & empowerment                    |
| Objective      | Maintain colonial order, extract resources | Social justice, inclusion, national integration |
| Laws           | CTA 1871, Scheduled District Act 1874      | Constitutional safeguards, PESA 1996, FRA 2006  |
| Administration | Centralised, autocratic                    | Decentralised, participatory (Panchayati Raj)   |

### Post-Independence Constitutional Provisions

| Provision       | Details                                                     |
|-----------------|-------------------------------------------------------------|
| Article 342     | Defines STs; President can declare tribes as STs            |
| Article 366(25) | ST means tribes deemed under Article 342                    |
| Article 244     | President can declare Scheduled Areas (Fifth Schedule)      |
| Sixth Schedule  | Administration of NE states (Autonomous District Councils)  |
| DPSP            | State shall promote educational & economic interests of STs |

|                  |                                                             |
|------------------|-------------------------------------------------------------|
| <b>Fifth FYP</b> | Introduced Tribal Sub-Plan (TSP) for integrated development |
|------------------|-------------------------------------------------------------|

## 9.1 — PARTICULARLY VULNERABLE TRIBAL GROUPS (PVTGs)

### PVTGs — Key Facts

- 🗺️ Dhebar Commission (1973) → created PTGs
- 1975: 52 PVTGs identified
- 1993: +23 → Total 75 PVTGs
- 2006: Renamed PTGs → PVTGs
- 18 States + 1 UT (2011 Census)
- Largest: Saharia (MP/Rajasthan, 4L+)
- Declining: Onge, Andamanese (inbreeding)
- Literacy: single digit → 30-40%

### Criteria for Identifying PVTGs

| # | Criteria                            |
|---|-------------------------------------|
| 1 | Forest dependent livelihood         |
| 2 | Pre-agriculture level of technology |
| 3 | Stagnant or declining population    |
| 4 | Low literacy rate                   |
| 5 | Subsistence-based economy           |

🗺️ **Xaxa Committee** — Refined PVTG identification criteria; emphasized tribes have fallen behind despite India's rapid expansion

### Key Issues Faced by PVTGs

| Issue                       | Details & Examples                                                                                                 |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------|
| <b>Livelihood</b>           | Food gathering, NTFP, hunting, shifting cultivation; FRA 2006 Sec 3(1)(e) recognizes community tenures             |
| <b>Forest Threats</b>       | 2009: Baiga families moved from Achanakmar Reserve; Kattunayakans prevented from honey collection in Mudumalai     |
| <b>Health</b>               | Anaemia, Malaria, GI disorders; poverty, lack of safe water, malnutrition                                          |
| <b>Bonded Labour</b>        | 🗺️ <b>Sahariya</b> (Rajasthan): bonded for generations; 🗺️ <b>Goti system</b> in Odisha (🗺️ <b>Anumena Yadav</b> ) |
| <b>Declining Population</b> | Onge, Andamanese (inbreeding); Birhor (stagnant); Great Andamanese, Sentinelese (very few)                         |

### FRA 2006 — PVTG Provisions

- **Section 3(1)(e)**: Recognizes community tenures of habitat for PTGs & pre-agricultural communities
- **Section 2(h)**: Defines 'habitat' as customary habitat in Reserved & Protected Forests

### Schemes for PVTGs

- **Development of PVTGs** — Ministry of Tribal Affairs
- **Conservation-Cum-Development (CCD)**: Annual plans by each state/UT, approved by Project Appraisal Committee

## 7.1 — DENOTIFIED TRIBES (DNTs)

### DNTs — Overview

- Criminal Tribes Act 1871 (later 1911)
- 150-200 communities labelled criminal
- Crime treated as genetic trait
- Repealed 1952 → "Denotified Tribes"
- Aug 31 = DNT "Independence Day"
- Stigma persists despite repeal

 **Dilip D'Souza** — Highlighted how **colonial law criminalized entire communities** without evidence

 **A.P. Jithender Reddy** — **Repeal alone won't fix DNT issues**; needs comprehensive rehabilitation

 **Shri Ananthasayanam Ayyangar Committee** — Recommended **CTA repeal**

### Classification Anomaly

#### Banjaras — Same Community, Different Classification

 **ST** in Andhra Pradesh, Odisha, Bihar | **SC** in Karnataka, Delhi, Rajasthan | **OBC** in Uttar Pradesh | **DNT** in Maharashtra, Tamil Nadu

### Challenges Faced by DNTs

| Challenge               | Details                                                                  |
|-------------------------|--------------------------------------------------------------------------|
| Social Stigma           | "Born criminals" label not abolished by 1952 Act                         |
| Economic Hardship       | Traditional occupations (snake charming, street acrobatics) criminalized |
| Large-scale Exclusion   | Many not classified under SC/ST/OBC; lack of data                        |
| No Permanent Commission | Unlike NCSC/NCST — no dedicated grievance body                           |
| Declining Population    | Result of accumulated disadvantages                                      |

### Key Committees & Recommendations

| Committee                                                                                                            | Key Data / Recommendation                                                                                           |
|----------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
|  <b>Renke Commission (2008)</b>   | Documented DNT socio-economic exclusion                                                                             |
|  <b>Idate Committee (2017-18)</b> | 809 Nomadic + 334 Denotified Tribes; recommended permanent commission, repeal of Habitual Offenders Act, sub-quotas |

### Government Schemes for DNTs

| Scheme                              | Purpose                                       |
|-------------------------------------|-----------------------------------------------|
| <b>Dr. Ambedkar Scholarship</b>     | Pre-matric & Post-Matric for DNT boys & girls |
| <b>Nanaji Deshmukh Scheme</b>       | Construction of hostels for DNT boys & girls  |
| <b>Skill Development Assistance</b> | For OBCs/DNTs/EBCs                            |

## 9.1 — ROLE OF NGOS IN TRIBAL DEVELOPMENT

**World Bank** — NGO: "private organizations that pursue activities to relieve suffering, promote the interests of the poor, protect the environment, provide basic social services, or undertake community development"

**M.N. Srinivas** — Developmental activities by missionaries viewed by Hindus as "bait in the trap of conversion"

**Dhebar Commission** — "In many places, the teachings of missionaries have led to a vertical division of society"

Key Social Workers & Institutions

| Person / Organisation                                                                                 | Contribution                                                                                                    |
|-------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|
|  <b>Thakkar Bapa</b> | Established Bhil Seva Mandal (Gujarat); 21 similar institutions; criticized isolationism, promoted assimilation |
| <b>Dr. Rajendra Prasad</b>                                                                            | Founded Bharatiya Adimjati Sevak Sangh — multi-dimensional tribal development                                   |
| <b>Ramakrishna Mission</b>                                                                            | Welfare at national/state level; character building; free from proselytization                                  |
| <b>Sarva Seva Sangh</b>                                                                               | Panchayat raj, prohibition, legal assistance                                                                    |

Case Studies — Tribal Welfare Interventions

|                                                                                                                                                                                                                                                                                      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <b>Jawadhu Hills Horti-Agro Forestry</b>   <i>Tamil Nadu</i><br>Additional income for single women families in tribal areas; men often migrate or lost to smuggling.                               |
|  <b>Arulagam NGO — Honey Cooperative</b>   <i>Nilgiris, Tamil Nadu</i><br><b>Sobha Madhan</b> (Kurumba Adivasi, NPVTG Federation coordinator). Income jumped from ₹200-300/kg → <b>₹1,000/kg</b> .  |
|  <b>Maharashtra Prabhodhan Seva Mandal</b>   <i>Surgana, Nashik</i><br>Piped water to every household; reduced women's workload significantly.                                                      |
|  <b>Synergy Sansthan</b>   <i>Madhya Pradesh</i><br>Sickle cell anaemia awareness camps among Saharia & Bhil communities — early detection & prevention.                                            |
|  <b>Kherwadi Social Welfare — "Period Homes"</b>   <i>Gadchiroli, Maharashtra</i><br>Led by Sarpanch <b>Tulavi</b> ; modern spaces replacing unsafe <b>kurma huts</b> ; menstrual health awareness. |
|  <b>International Justice Mission (IJM)</b>   <i>Hassan, Karnataka</i><br>Rescued <b>24 bonded labourers including 10 children</b> from brick kiln; workers trafficked from Krishnagiri (TN).     |
|  <b>Natya Chetana — Tribal Theatre Revival</b>   <i>Odisha</i><br>Since 1986: trained 500+ tribal youth; 25 major plays, 50+ cycle-theatre expeditions village to village.                        |

Limitations of NGOs

| Limitation                    | Details                                                                                           |
|-------------------------------|---------------------------------------------------------------------------------------------------|
| <b>Fund Misuse</b>            | Shilu Ao Committee (1960): financial irregularities; NITI Aayog (2020) & CAG: accountability gaps |
| <b>FCRA Non-compliance</b>    | 2011-2023: 12,000+ NGOs (incl. Oxfam India) lost foreign funding licences                         |
| <b>Anti-Development Image</b> | 2014 IB Report: Greenpeace, Amnesty, ActionAid reduced GDP by 2-3% (claim unverified)             |
| <b>Lack of Transparency</b>   | CAG 2018: Less than 10% of NGOs submitted annual reports or audits                                |

## 9.2 — ROLE OF ANTHROPOLOGY IN TRIBAL & RURAL DEVELOPMENT

**M.N. Srinivas (1972)** — At Simla seminar: "sharply increased awareness of the importance of associating anthropologists in the solution of complex problems"

 **John Van Willigen** — "Anthropology put to use" = Applied Anthropology

 **Kedia and Van Willigen** — Applied Anthropology = "complex of related, research-based, instrumental methods which produce change or stability in specific cultural systems"

### Why Anthropologists' Studies Help

| Method                  | Contribution                                     |
|-------------------------|--------------------------------------------------|
| Cultural Relativism     | Neutral perspective without preconceived notions |
| Participant Observation | Insider perspective; become part of society      |
| Holistic Studies        | Every aspect analyzed from multiple dimensions   |
| Integrated Studies      | Understand how elements are interconnected       |

### Key Anthropological Contributions to Tribal Development

| Contribution              | Scholar / Details                                                                                                                                                                                                                 |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Nature-Man-Spirit Complex |  <b>L.P. Vidyarthi</b> — equilibrium between ecology, social organization, superhuman component; helps plan rehabilitation with least resistance |
| Tribe-Caste Continuum     | Shows influence of tribal & non-tribal communities over centuries; difficult to define tribes with specific criteria                                                                                                              |
| Integrationist Approach   |  <b>Elwin</b> — 'A Philosophy for NEFA' (1957); tribes retain identity; choice left to tribals                                                 |
| PVTG Category             |  Dhebar Commission (1973) → PTGs; anthropologists highlighted vulnerabilities                                                                  |
| Tribal Sub Plan (TSP)     |  <b>Prof. S.C. Dube</b> — chaired TSP Expert Committee (1972); adopted in Fifth FYP                                                            |
| CTA Repeal & DNTs         | Anthropologists provided understanding of history/culture; advocated DNTs as equal citizens                                                                                                                                       |
| Forest Rights             | <b>B.K. Roy Burman Committee (1982)</b> — community-based forest management → shaped FRA 2006                                                                                                                                     |
| Xaxa Committee (2014)     | <b>Virginus Xaxa (TISS)</b> — 6 themes: livelihoods, education, health, land alienation, displacement, legal issues                                                                                                               |
| Tribal Health             |  <b>Dr. Abhay Bang</b> — Expert Committee; report: "Tribal Health in India — Bridging the Gap"; 2.5% GDP per capita for tribal health          |
| Endangered Languages      | Linguistic research, documentation, revitalization advocacy                                                                                                                                                                       |

### Anthropology in Rural Development

| Concept                             | Scholar          |
|-------------------------------------|------------------|
| Dominant Caste                      | M.N. Srinivas    |
| Sanskritization & Westernization    | M.N. Srinivas    |
| Little Republics                    | Charles Metcalfe |
| Rural Cosmopolitanism               | Oscar Lewis      |
| Little & Great Traditions           | Robert Redfield  |
| Universalization & Parochialization | McKim Marriott   |
| Sacred Complex                      | L.P. Vidyarthi   |
| Nature-Man-Spirit Complex           | L.P. Vidyarthi   |

### Application Areas

| Area | Anthropological Contribution |
|------|------------------------------|
|------|------------------------------|

|                                  |                                                                                                                                    |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <b>Agrarian Social Structure</b> | Land relations, caste hierarchy, ritual power; inequality rooted in cultural values & kinship; guided land reform & Panchayati Raj |
| <b>Left-Wing Extremism</b>       | Micro-level accounts of deprivation among Santhal, Munda, Gond; shaped PESA (1996) & FRA (2006); rebellion = cultural resistance   |
| <b>Regionalism</b>               | Regional movements from cultural neglect & symbolic exclusion; Vidyarthi: sacred centres (Gaya) unite groups; Jharkhand/NE studies |

**David G. Mandelbaum (1990)** — "Anthropology and Challenges of Development" — fieldwork tradition helped locate channels of social change, emerging power structures, role of communication in breakdown of caste prejudices. Anthropologists play a **massive role in nation building**.

---

## 9.3 — COMMUNALISM

 **D.C. Smith (1979)** — Communalism: "an ideology based on the belief that society is divided into religious communities whose interests differ and are opposed to each other and hence antagonistic in nature"

### Factors Responsible for Communalism

| Factor                    | Details & Examples                                                                                                                              |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Divisive Politics      | Religion/cultural identity to mobilize support; "majority-minority divide" for votes; weakens secular democracy                                 |
| 2. Appeasement            | <b>Shah Bano Case (1985-86)</b> : SC upheld maintenance rights → Rajiv Gandhi reversed via Muslim Women Act 1986 → vote-bank politics           |
| 3. Religious Mobilisation | <b>Rath Yatra (1990)</b> → Babri Masjid demolition (1992) → violence from both sides                                                            |
| 4. Economic Causes        | UN MPI (2023): 1 in 3 Muslims multidimensionally poor; Hindu-Muslim trader competition; outdated madrasa education                              |
| 5. Historical Factors     | Past history of conflict → recurrence; delays in justice allow disputes to grow                                                                 |
| 6. Psychological          | Social distance & fear; misunderstanding; Karnataka Anti-Conversion Bill (2021) protests                                                        |
| 7. Media/Social Media     | Delhi Riots (2020): viral videos spread misinformation; social media <b>nationalises local conflicts</b>                                        |
| 8. Civic Ties             | <b>Saumitra Jha</b> : Gujarat port towns with trade ties = 25% less riots; <b>Ashutosh Varshney (2002)</b> : civic associations reduce violence |

### Instances of Communal Violence

| Event              | Year | Key Details                                                                                                           |
|--------------------|------|-----------------------------------------------------------------------------------------------------------------------|
| Partition Riots    | 1947 | ~15 million displaced; ~1 million lives lost; trauma of divided homeland                                              |
| Anti-Sikh Riots    | 1984 | After PM Indira Gandhi's assassination; thousands killed; gurdwaras destroyed                                         |
| Gujarat Riots      | 2002 | Sabarmati Express at Godhra (59 Hindu pilgrims killed) → retaliatory violence across state                            |
| Kandhamal Violence | 2008 | Odisha; after killing of Swami Laxmanananda Saraswati; Maoists claimed responsibility; Christian communities attacked |

### Features of Communal Riots (Last 5 Decades)

- More **politically motivated** than fuelled by religion
-  **Mandan Commission** — Maharashtra (May 1970): "architects of communal tensions are communalists and a certain class of politicians"
- Besides political interests, **economic interests** play vigorous part
- More common in **North India** than South/East
- Possibility of **recurrence stronger** in previously affected towns
- Most occur during **religious festivals**
- Use of **deadly weapons** on the ascendancy

### Overall Assessment

- India: 1.4 billion people; **99% coexist harmoniously** every day
- Incidents are **exceptions rather than the rule**
- "We're all minorities in India" — land of rich diversities
- **"Acceptance of difference rather than mere tolerance"** — great Indian secret

 **Swami Vivekanand** — Inspired from Rig Veda: **"Ekam Sat Vipra bahudha vadanti"** — "There is only one truth and learned persons call it by many names"

## QUICK-REVISION CHEAT SHEET
